出版路径”

缺乏对于那些已经证明有效的干预措施的应用研究

Evaluation of research on interventions aligned to WHO 'best buys' in LMICs: a systematic review 1990-2015 in 115 countries

Allen LN, Pullar J, Wickramasinghe KK, et al. Evaluation of research on interventions aligned to WHO 'Best Buys' for NCDs in low-income and lowermiddle-income countries: a systematic review from 1990 to 2015. *BMJ Glob Health* 2018;3:e000535. doi:10.1136/bmjgh-2017-000535

循证干预措施的现实证据挑战

- 89%的“best buy”在低收入和低中收入国家不存在循证证据
- 24项世卫推荐的“best buy”中：
 - 仅有4项内容有超过两个不同的研究提供证据支持：小组戒烟、公众场所禁烟、宫颈癌筛查、乙肝疫苗接种
- 而这些国家是最需要实施慢病预防的国家

Are WHO "best buys" for non-communicable diseases effective in low-income and lower-middle-income countries? A systematic review

Abstract

The World Health Organization's Global Strategy on Diet, Physical Activity and Health (WHO GSDPAH) has identified 24 interventions as "best buys". These 24 interventions recommended by WHO include tobacco taxation, salt reduction, healthy pricing, and aquafeeding. Although the target countries of NCDs is in low-income and lower-middle-income countries, evidence for most of the 24 best buys come from high-income countries. We did a systematic review to answer questions for the effectiveness of best buys in low-income and lower-middle-income countries (LMICs), where the need for effective NCDs interventions is greatest.

Objectives: Given a reported protocol (PROSPERO: CRD4201300452) and following PRISMA guidelines, we planned a systematic review to evaluate the effectiveness of the 24 interventions as defined in the WHO GSDPAH Global Action Plan on NCDs. We included studies that were undertaken in the countries defined in the World Bank as LMICs (published before 2010), and Fig. 5, 2015. We assessed the reported outcomes through a risk of bias that compared interventions with usual health care. Our analyses independently assessed primary using a pooled effect. We pool results from New Zealand, Brazil and Indonesia trials to assess risk of bias and adopted a narrative approach to due synthesis. Primary outcomes were all-cause mortality, preventable and non-fatal endpoints.

Search: Our search returned 3877 records after duplicate removal and we included 32 studies in the final review, of which 26 had been done in India, 19 of the Americas, reported on cardiovascular health, two pertained to HIV and physical activity, four were on oral cancer/colon reduction, and 17 on cancer prevention. Only four "best buys" had evidence that showed that the intervention was effective: group smoking reduction approaches, smoking bans in public places, revised sugar-sweetened and trans-fat recommendations. There was no evidence for the effectiveness of any further intervention of 24 of the 24 NCDs (Fig. 5).

Conclusion: There is an urgent need to make further establishment of the evidence evidence from high-income countries are effective in low-income settings. Our call following on the warning of the warning of the WHO best buy documents ought have expanded with sufficient studies involving LMICs under the coordination of scope and shall a well-reasoned research strategy.

为什么需要实施研究？

医疗卫生领域各类转化研究

从疾病控制角度关于医学研究分类

	研究的主要科学问题	案例	应用
观察性研究 Observational study	疾病的病因或者影响因素? 疾病对人群健康的影响?	Seven country study, Framingham study, 英国医生吸烟队列, Interheart, Intersalt, Whitehall study, PURE study	疾病病因或危险因素调查与评估；评估人群与环境健康；社会与舆论动员、
干预性研究 Interventional study	有无干预措施? 干预措施的效果如何?	MRFIT, North Karelia project(芬兰), Stanford three community study/five community study, IHHP(伊朗)、大庆糖尿病预防项目、首钢高血压研究, HOPE4	评估干预与结果之间的关系；用于循证公共卫生和疾病控制实践
实施性研究 Implementation Research	干预措施是否在不同的环境中实施并达到预期效果? 什么策略可促进循证基础的干预措施的实施?	SAIHELI Trial, ACTIVATE, PACE study, EIRA study	促进循证实践和研究的方法和策略在真实世界应用：调查干预措施、规范、指南在实际应用中的差距以及影响因素；制定策略促进干预措施与指南实施；促进实施策略与干预措施效果评估

卫生系统和政策研究

生物医学研究

基础研究：
物理和生物科学，包括
化学、药理学、毒理学、
遗传学等。

药品、疫苗、诊断、器具等的研
究和开发。

了解疾病的生物学性质。创造预防或
治疗疾病状态的产品

卫生政策和系统研究

政策制定、证据关系、优先
排序等研究。

研究卫生系统管理、功能
、效率、效力、影响获取
的系统因素、扩大规模、
监测和评价等。

社会科学和行为研究

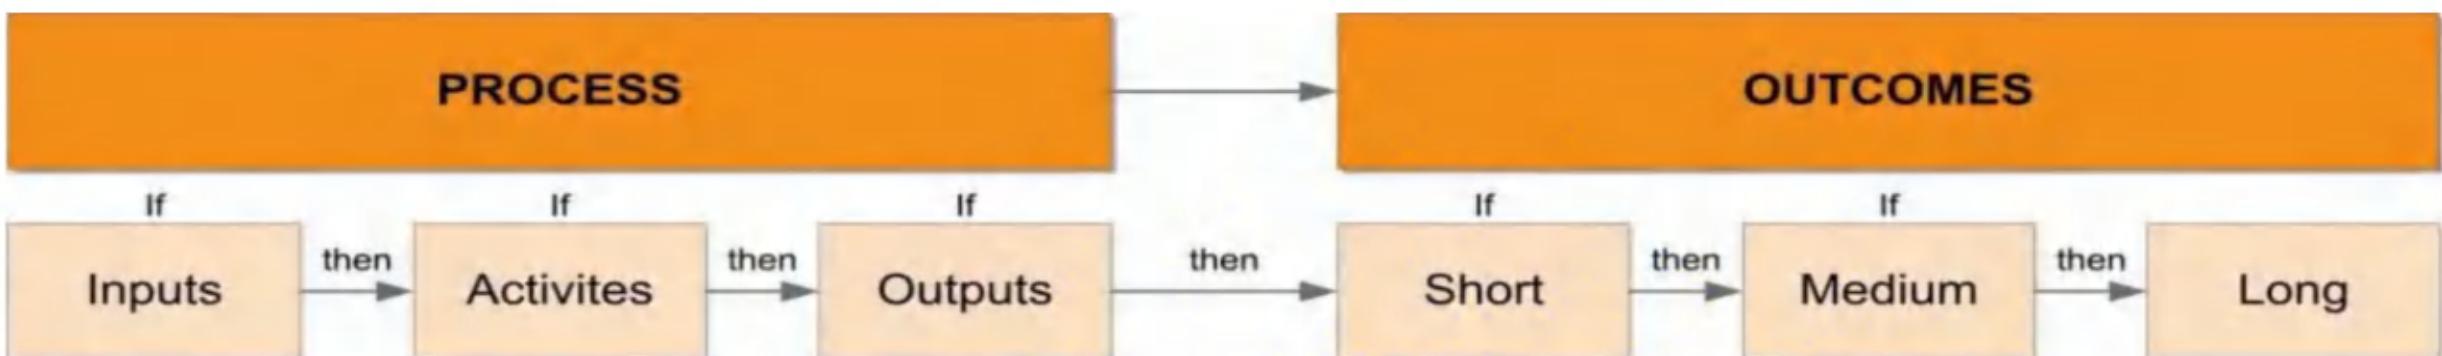

研究影响健康的社会和行为
因素及其与公平、获得、生
活方式和健康寻求行为等的
关系。

了解如何测试、扩大和跟踪干预措施的引入，以优化其效益

影响

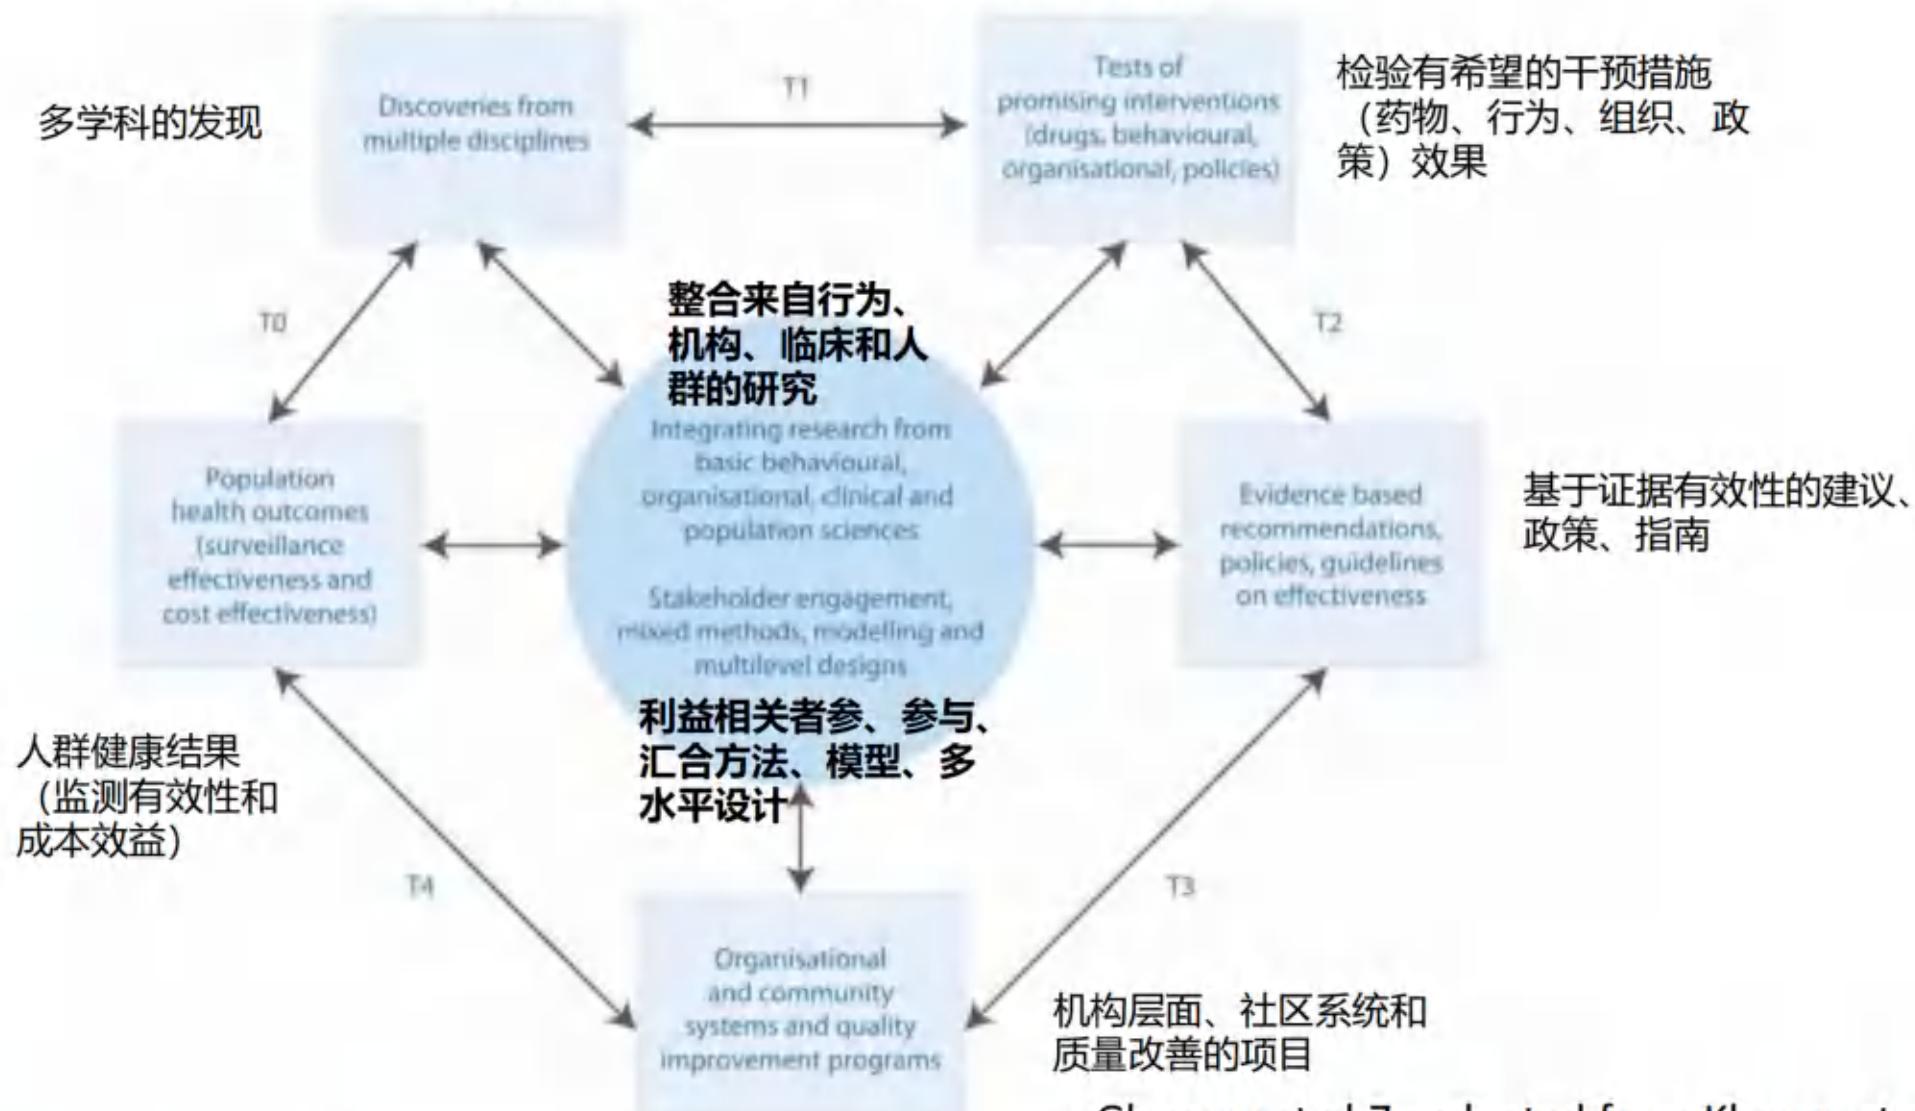

传统卫生项目的实施过程与结果

- A logic model is a graphic “snapshot” of how a program works (its theory of change); it communicates the intended relationships among program components.

转化研究的T0-T4阶段

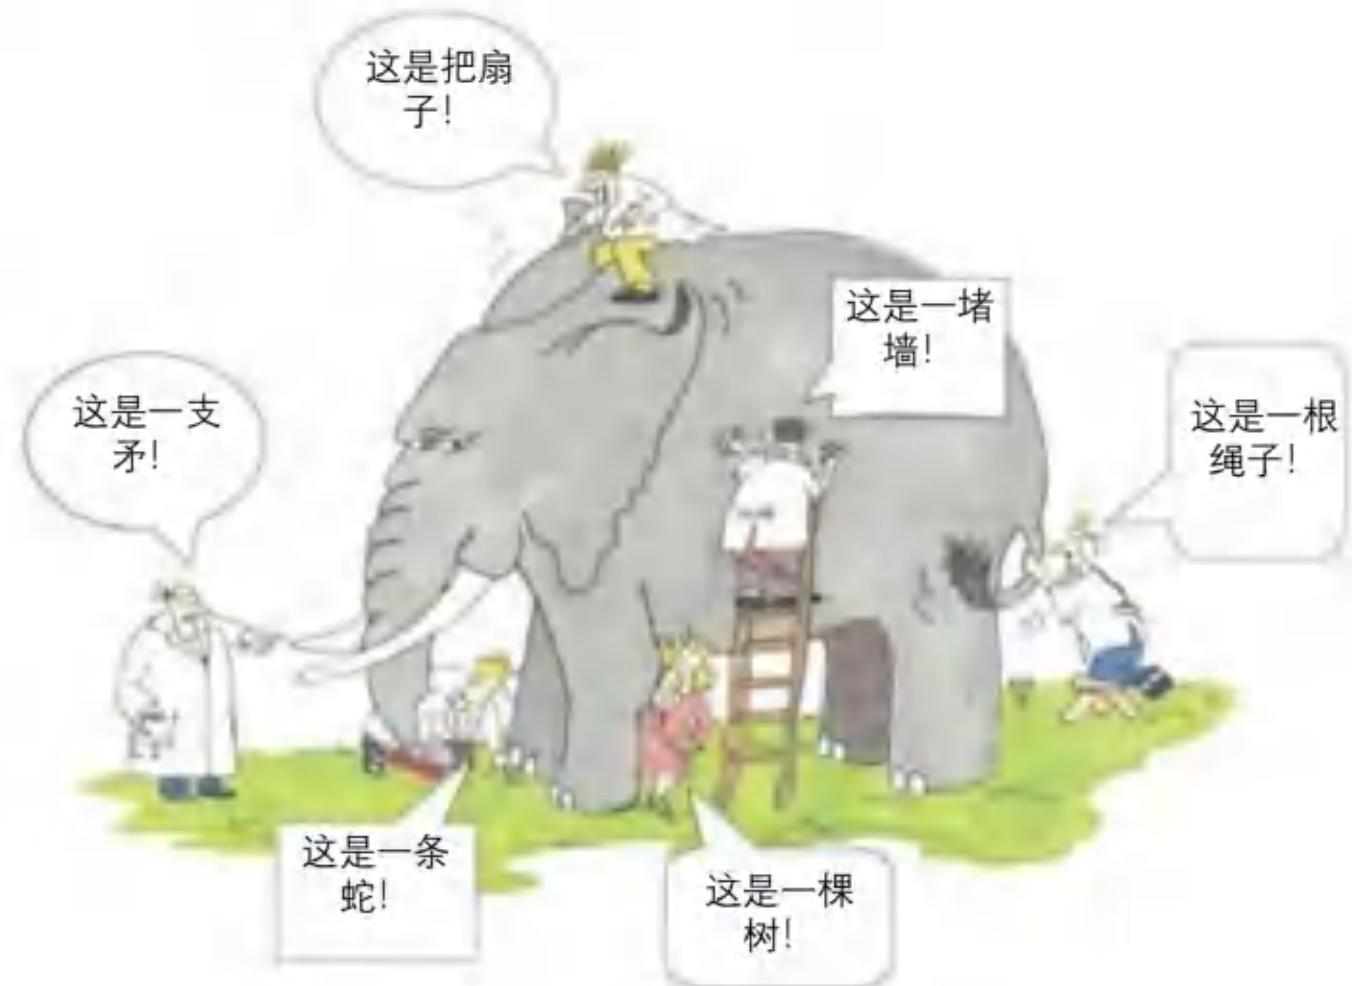

T0–T4 phases of translational research

: Glasgow et al.7 , adapted from Khoury et al.6

如何促进循证干预策略和措施的实施？

- 流行病学研究
(Epidemiological study?)
- 运筹 (Operational research
(OR)?
- 评估研究 (Evaluation
study? (Process evaluation?
Impact evaluation))
- 加强卫生系统研究 (Health
systems strengthening) ?
- 实施科学的研究
(Improvement science?)

二、核心概念 (core concepts)

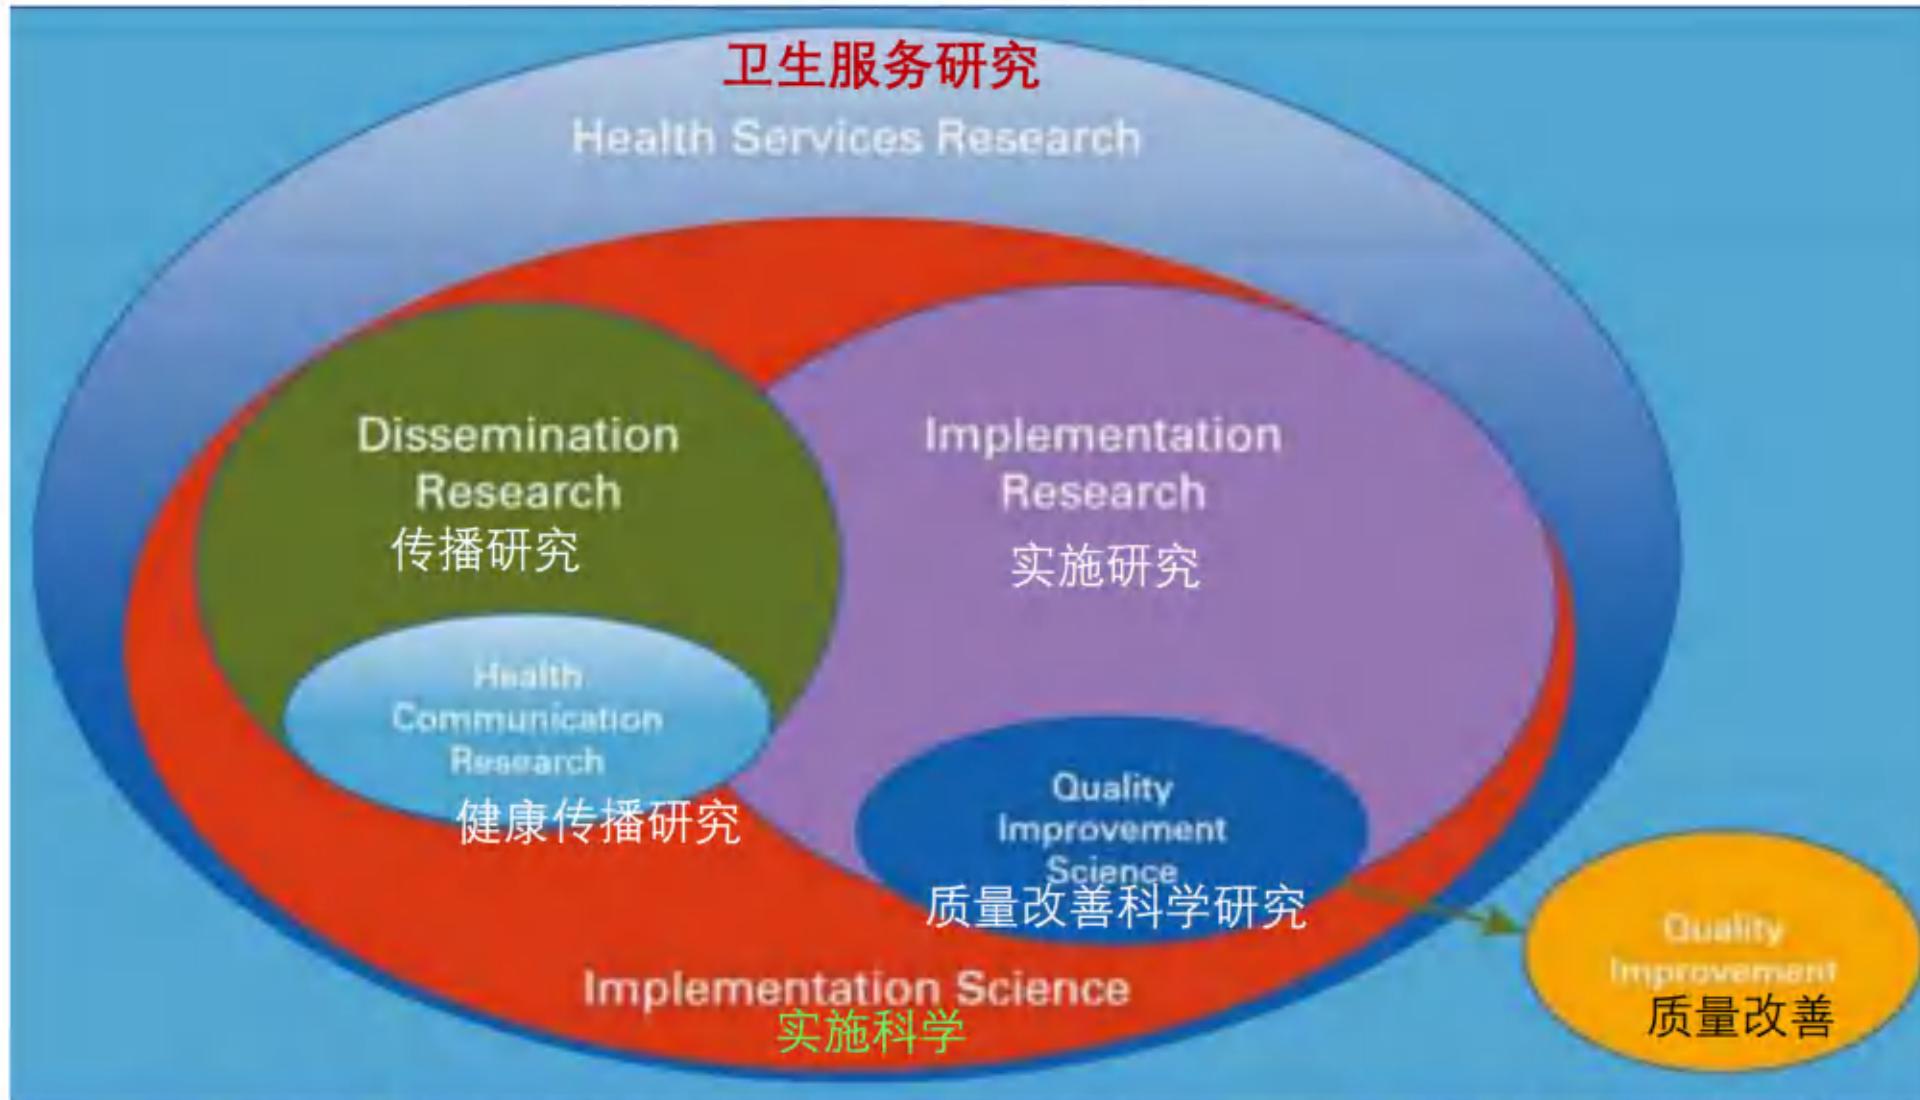

背景和概念

什么是实施科学？

实施科学

Implementation science

Mitchell SA, Chambers D. Leveraging Implementation Science to Improve Cancer Care Delivery and Patient Outcomes. JOP 2017; 13(8):523-529

实施科学

解决循证干预向实践应用推广过程中
面临的问题而提出的交叉学科

■ Science 科学

■ Systematic knowledge building

系统性的产生科学证据、完善科学体系

■ Implementation 实施

■ Promote the translation from evidence into practice

促进循证证据和循证实践向真实世界实施转变

什么是实施科学?

definition

Implementation science is commonly defined as the study of methods and strategies to promote the uptake of interventions that have proven effective into routine practice, with the aim of improving population health. (实施科学通常被定义为针对实施有关的方法和策略研究，以促进循证干预措施纳入常规实践系统，缩小已有知识和实际采纳使用之间的差距，从而改善人群健康。)

source

[Eccles/Mittman](#) 2006

Implementation Research has the basic intent to understand what is and isn't working, how and why implementation is going right or wrong and to test approaches to improve implementation (实施研究的基本目的是了解什么是有效的，什么是无效的，实施如何以及为什么是正确的或错误的，并研究改进实施的方法。)

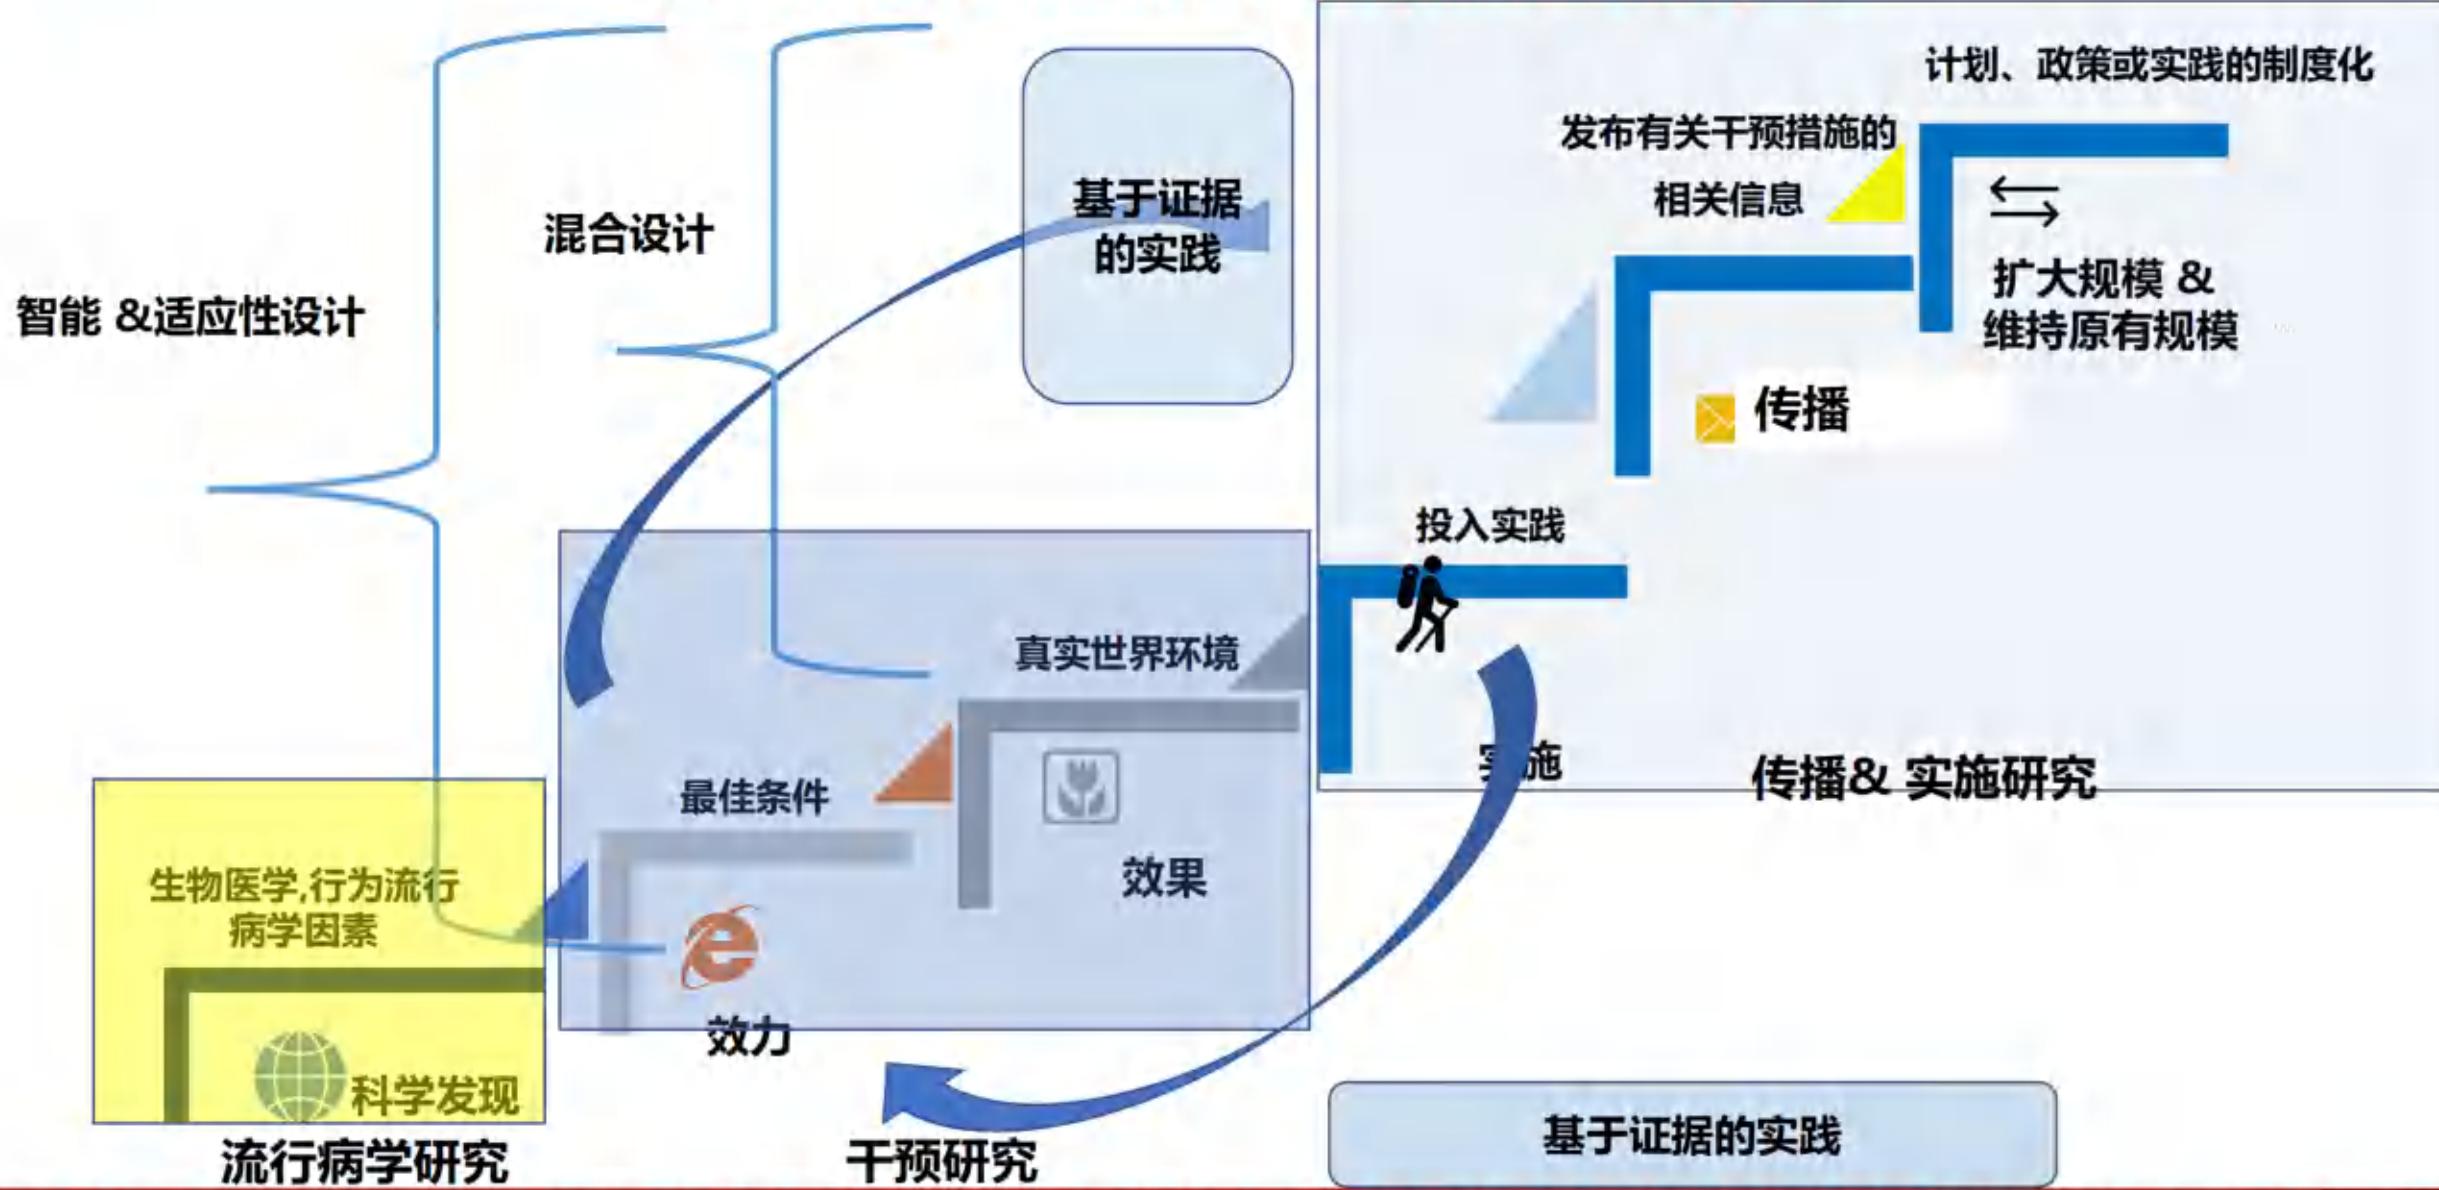

Implementation Research in Health, a practical guide;
AHPSP WHO, 2013

Implementation Research is the application and creation of knowledge to improve the implementation of health policies, programmes, practices, intervention or guideline (实施研究是通过创造和应用知识，以促进卫生政策、方案、实践、干预措施或指导方针的实施。)

Theobald S et al. Lancet, 2018; forthcoming

从科学发现到常规卫生项目的路径

Pathway from basic discovery to regular health program

为什么实施的场境很重要？

如何理解实施科学中的场景？

What is **context** in IR?

A

Evidence-based intervention or best practice

循证干预或者最佳实践

- 干预或者卫生服务研究运用各种科学的研究方法， Intervention research or Health system research using RCT or other research methods
- Best practice from other environment 来源于其他环境的最佳实践

B

Complicate context in real world

现实世界的复杂性

- 文化决定因素 (**Culture determinants**)
- 社会关系和支持 (**Social relations and support**)
- 组织支持 (**Organizational support**)
- 组织文化和气氛 (**Organizational culture and climate**)
- 组织准备好变革 (**Organizational readiness to change**)
- 物理环境 (**Physical environment**)
- 病人 (**Patients**)
- 其他地方上的特殊因素 (**Others specific factors in local society**)

如何理解实施研究中的场境?

What is context in IR?

A

Evidence-based intervention or best practice

循证干预或者最佳实践

- **干预或者卫生服务研究运用随机对照或者其他科学的研究方法**, Intervention research or Health system research using RCT or other research methods
- **来源于其他环境的最佳实践** Best practice from other environment

B

WHO推荐的最佳干预措施和服务包

WHO best buys interventions

慢性病最佳干预措施

减少烟草使用

- 提高烟草制品消费税和价格
- 实施平装/标准化包装及/或在所有烟草包装上使用大幅图片健康警语
- 制定并实施法律，全面禁止烟草广告、促销和赞助
- 消除所有室内工作场所、公共场所、公共交通的二手烟暴露
- 实施有效的大众媒体宣传行动，向公众讲解吸烟/使用烟草和二手烟的危害

减少有害使用酒精

- 提高对酒精饮料征收的消费税
- 制定并执行针对酒类广告的禁令或全面限制令（跨多种媒体类型）
- 立法（通过缩短销售时间）限制零售酒类的实际可获得性并执行这些限制措施

控制不健康饮食

- 调整食品配方降低含盐量并确定食品和餐饭含盐量目标，减少盐摄入量¹²
- 在医院、学校、工作场所、疗养院和公共机构中建立支持性环境，促进提供低钠份饭，减少盐摄入量
- 开展促进行为变化的宣传和大众媒体行动，减少盐摄入量
- 落实包装正面标签规定，减少盐摄入量

减少身体不足活动

- 在整个社区开展鼓励身体活动的公共教育和宣传运动，包括开展大众媒体运动，并实行基于社区的其它教育、激励和环境规划，以促进行为变化、增加身体活动¹³

管理心血管疾病和糖尿病

- 为曾发生过心脏病发作或脑卒中的个人以及在今后 10 年内有致命和非致命心血管事件高度风险（≥30%）的人提供药物治疗（包括从控制总风险¹⁴角度进行糖尿病血糖控制和高血压控制）和咨询
为曾发生过心脏病发作或脑卒中的个人以及在今后 10 年内有致命和非致命心血管事件的中高风险（≥20%）的人 提供药物治疗（包括从控制总风险角度进行糖尿病血糖控制和高血压控制）和咨询

管理癌症

- 9-13 岁少女接种（2 剂）人乳头状瘤病毒疫苗 筛查 30-49 岁妇女，预防宫颈癌，可选用如下技术：
 - 醋酸试验肉眼观察法，并结合及时治疗癌前病变²²
 - 每三五年进行一次巴氏涂片（宫颈细胞学）检查，并结合 及时治疗癌前病变
 - 每五年进行一次人乳头状瘤病毒检测，并结合及时治疗癌前病变

三、研究目的和科学问题 (Research aim & question)

你的研究目的是什么？

1. 了解与实施有关的障碍和有利因素 (understand barriers and facilitators to implementation)
2. 调整基于证据的干预措施 (adapt an Evidence-based intervention (EBI))
3. 选择、开发和调整实施策略 (select/develop/adapt implementation strategies)
4. 评估实施策略的可行和可接受性 (evaluate the feasibility/acceptability of strategies)
5. 评估调整的干预措施效果 (evaluate the impact of an adapted EBI)
6. 评估实施策略的效果 (evaluate the performance of a strategy)
7. 评估实施的效果 (assess the impact of implementation)

如何提出“实施研究”关心的 “科学问题”

- 主要的实施挑战是什么？针对哪些利益相关方（比如目标人群、医疗保健服务人员、管理人员、政策制定者）？
- 可能影响实施的干预措施的关键场景因素是什么？
- 影响干预措施实施的主要组织有哪些？
- 它们如何促进或阻碍实施？
- 实施是我们预期或期望的吗？
- 为什么会这样？哪些因素（阻碍或促进因素）可能影响实施和应用？
- 何种政策或干预措施最适合新的环境？实施它的最佳方式是什么？
- 如何将实施成本降到最低？
- 如何扩大和维持干预措施，使健康效益最大化？

实施科学的研究的科学问题

Peters DH, Peters MA, Wickramasinghe K, Osewe PL, Davidson PM. Asking the right question: implementation research to accelerate national non-communicable disease responses. *BMJ*. 2019 May 20;365:l1868. doi: 10.1136/bmj.l1868. PMID: 31110030; PMCID: PMC6526393.

案例一实施研究问题：实施结果

可接受度
Acceptability

实施者(例如管理人员和服务人员)和目标人群对干预措施的认同度?
健康问题或干预措施对目标人群的重要性?

采用
Adoption

关键利益相关方(如管理人员、医疗保健服务人员、目标人群)将在多大程度上决定尝试新的干预措施?

适应 (Adaptation)

在多大程度上实施干预措施以及如何实施会根据实施过程中的学习而改变?

相关性 (Relevance)

实施者或目标人群在多大程度上相信干预措施与他们的现实条件相关?

可行性 (Feasibility)

实施组织或目标人群能在多大程度上实施非传染性疾病的干预措施?

忠实度 (Fidelity)

干预措施能按照原本设计实施到什么程度(例如合适的工作人员、培训、强度和实施的一致性)?

成本 (Cost)

干预措施成本是多少?不同环境下的成本差异?能否在不影响实施效果的情况下降低成本?

覆盖面 (Coverage)

干预措施的目标人群是否真的进行了干预措施?为什么没有呢?如何扩大项目规模?

可持续 (Sustainability)

干预措施的可持续性(例如组织、社会、经济、政治、技术等方面)?

四、实施研究产生的理论、框架和模型

2.

改变的理论

Theory of Change

它解释了（活动）对（投入）的使用如何产生一组（产出和结果），从而为产生（影响）奠定了基础。 It is an explanation of how the use of (inputs) by (activities) produce a group of (outputs and outcomes) that sets the stage for producing (impact).

理论, 模型和框架 Theory, model and framework

A theory is "a coherent and non-contradictory set of statements, concepts or ideas that organizes, predicts and explains phenomena, events, behaviour, etc.
理论是“一个连贯且不矛盾的概念或思想体系，用于组织、预测和解释现象、事件、行为等。”

——Bem S and Looren-de-Jong H, 1997

Models are specific and attempts to objectify the concept they represent - has value even if not complete
模型是具体的，旨在客观呈现其所代表的概念。

——Frnkfort-Nachmias et al, 1996

A framework provides a frame of reference, assists in organizing thinking and guides the user on what to focus on.
框架提供了一个参考体系，帮助理清思路，并引导使用者关注关键点。

——Rycroft-Malone and Bucknall, 2010

理论、模型和框架的不同之处

Differences of theory, model and framework

理论 Theory

- “理论”为**理解、解释和预测**现象提供了一种系统的方法。在实施科学的情境下，“理论”通常解释了某些因素**为什么以及如何**影响实施结果。
- 例如：创新扩散理论，NPT

模型 Model

- 实施科学中的“模型”更具**描述性**，通常旨在**表示实施中涉及的过程**，而不是提供深入的解释，“模型”倾向于**制定实施所需的步骤或阶段**。
- 例如：COM-B，创新扩散理论

框架 Framework

- 框架对与实施相关的概念或因素进行分类和组织，而**不一定指定它们之间的关系**。框架通常用于**指导对实施决定因素、策略或结果的识别和分析**。
- 例如：CFIR、RE-AIM

改变理论

Theory of Change – 从传统项目管理路径出发

投入 (input)

- Materials
- Trainers
- Participants

活动 (Activity)

- Conduct training
- Followup

产出 (Output)

- # of Participants trained
- # of workshops

结果 (Outcome)

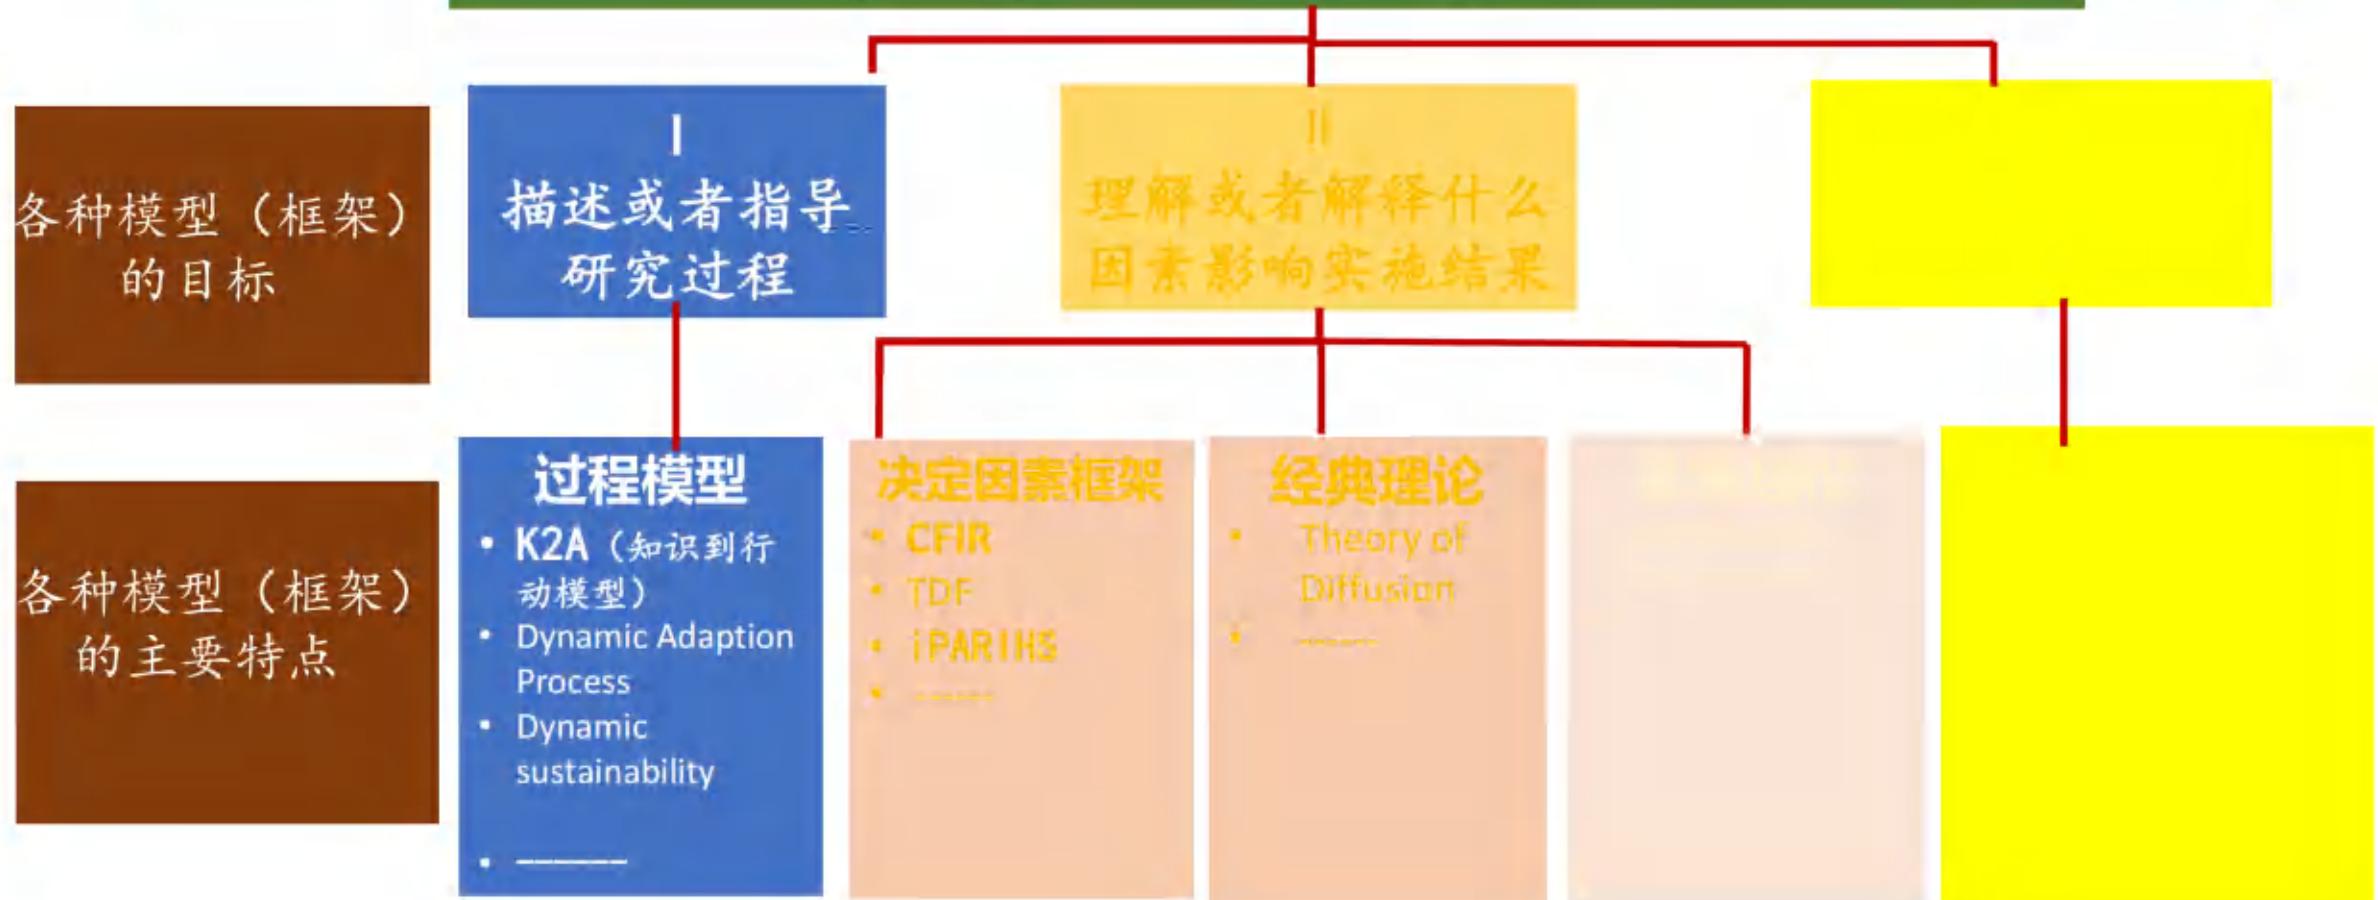

- Capable participants to apply M&E techniques

效果 (Impact)

- Better decisions

实施科学中所使用的理论，模型和框架

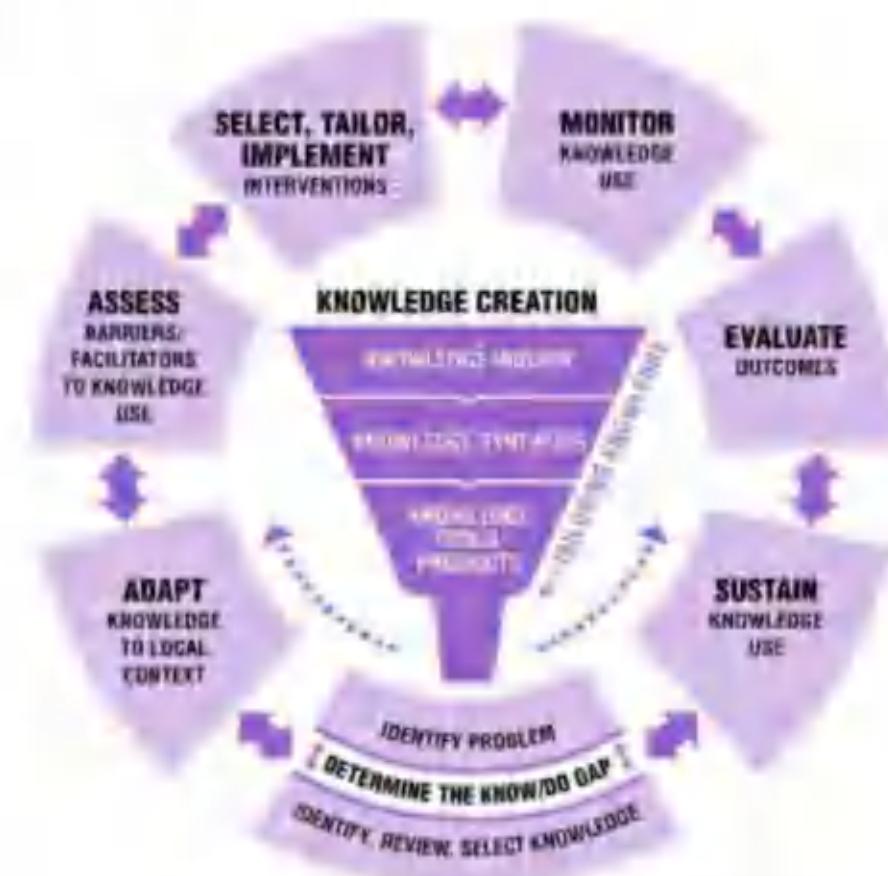

I- 过程模型 Process Model

■ 案例：Knowledge-to-action Framework

从知识到行动包括7个步骤

1. 确定问题/选择解决问题的知识
2. 将证据引入特定情境（adapt）
3. 评估证据本身、潜在采纳者、实施环境的促进和阻碍因素
4. 执行干预措施
5. 监测知识应用
6. 知识应用后结果评价
7. 维持知识应用

scientific knowledge. However, it is

实施科学中所使用的理论，模型和框架

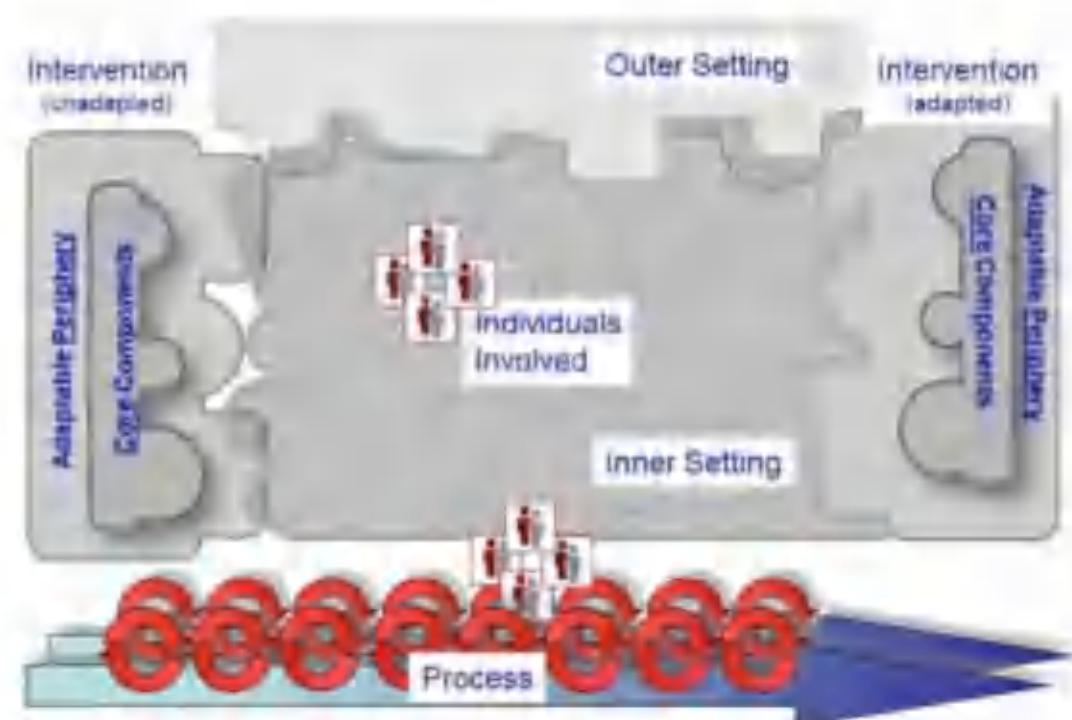

II-1 决定因素框架 (1)

(Determinant frameworks)

Consolidated Framework for Implementation Research (CFIR)

- 2009年Damschroder等人回顾了500余篇实施性研究文献，查找和筛选出设计传播、创新、组织变革、实施、知识转化和应用研究等方面的19个理论与模式，通过这些现存理论或模式中的结构进行提取和分析，整合出CFIR框架（meta-theoretical framework）
- CFIR框架包含5个主要维度及39个构成要素
 - 干预特征 (intervention characteristics)
 - 外部因素 (outer setting)
 - 内部因素 (inner setting)
 - 个体特征 (Characteristics of individuals)
 - 实施过程 (process)

CFIR应用：高血压、糖尿病级联效应项目研究

识别影响因素+构建实施策略 共同设计 (Co-design) : 共创工作坊

基于CFIR
识别影响因素

使用CFIR-ERIC工具
识别潜在策略

策略匹配结果
本土化

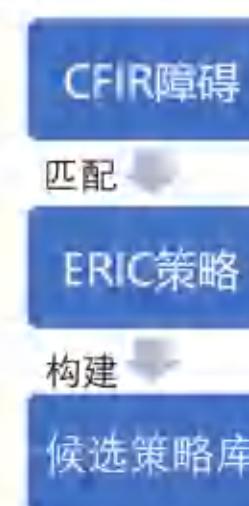

实施策略共创
1 清单评估

实施策略共创
2 焦点小组共识构建

根据级联不同阶段：
意识、筛查、诊断、治疗、长期管理等

对CFIR的五大维度
进行匹配：

- 干预特征
- 外部因素
- 内部因素
- 个人特征
- 过程

农村本土化原则：
• 低成本
• 低技术依赖
• 文化适配

参与的利益相关者：
• 干预提供者9人
• 政策制定者3人
• 慢病专家6人
• 技术合作方6人

对候选策略库进行独立评估
双维度：重要性、可行性
5级Likert评分

第一轮：使用优先级矩阵将实施策略条目归类至四个象限
(重要性vs可行性)

第二轮：对争议策略进行加权评分
争议策略：跨象限 ≥ 2 组
权重：
村医实践经验占40%
专家证据强度占30%
技术可行性占30%

II-2、经典理论 Classic theories

参考心理学、社会学、组织学等传统学科的经典理论，通常用于解释而不指导变化的发生

1. 心理行为改变理论 Psychological behavior change theories”
 - Theory of reasoned action
 - Social cognitive theory
 - Theory of planned behavior
2. 社会科学理论 Social science theories
 - Social network, social capital
3. 组织层面的理论 Organizational level theories
4. 扩散理论 Theory of Diffusion

II-2、经典理论

Theory of diffusion

Source: Diffusion of innovation, Rogers 1995

1. 创新者(敢于冒险者, 占比2.5%);
2. 早期采用者(adpters)(受人尊敬者, 占比13.5%);
3. 早期大众(深思熟虑者, 占比34%);
4. 后期大众(多疑者, 占比34%);
5. 落后者(传统者, 占比16%)

当创新具有如下特征时, 它们会被更快地采用:

- (1) 相对优势性(和现有的方法相比有相对优势);
- (2) 相容性(与现有的价值观、过去的经验以及当前的需求相容);
- (3) 易懂性(简单易懂);
- (4) 可试性(可以被潜在采用者尝试或使用);
- (5) 可观察性(采用者可以看到结果)。

消费者电子健康创新

A consumer e-health innovation

RESEARCH ARTICLE

Open Access

Using diffusion of innovation theory to understand the factors impacting patient acceptance and use of consumer e-health innovations: a case study in a primary care clinic

Xiaoxin Zhang¹, Feng Yu¹, Jun Yan¹ and Li Tan A-Mi²

Abstract

Background: Consumer e-health is a potential solution to the problem of accessibility, quality and time of receiving public healthcare services to patients. Although consumer e-health has proliferated in recent years, it remains unclear if patients are willing and able to accept and use this new and rapidly developing technology. Therefore, the aim of this research is to study the factors influencing patient acceptance and usage of consumer e-health innovations.

Methods: A single Dutch-type consumer e-health innovation – an E-consultation (including telephone, web, e-mail) and implemented in a primary health care clinic in a regional town in Austria. A longitudinal case study was undertaken for 24 months after system implementation. The major factors influencing patient acceptance and use of the E-consultation service were examined through the theoretical lens of Rogers' innovation diffusion theory. Link with adoption from the computer literature of 1240 patients who visited the medical clinic in our study setting and had used e-health services with 25 patients.

Zhang, X., Yu, P., Yan, J. et al. Using diffusion of innovation theory to understand the factors impacting patient acceptance and use of consumer e-health innovations: a case study in a primary care clinic. *BMC Health Serv Res* 15, 71 (2015). <https://doi.org/10.1186/s12913-015-0726-2>

研究结果表明，医疗保健提供者在实施更复杂的消费者电子健康创新之前需要考虑并解决已确定的因素

II-3 实施理论

Implementation theory

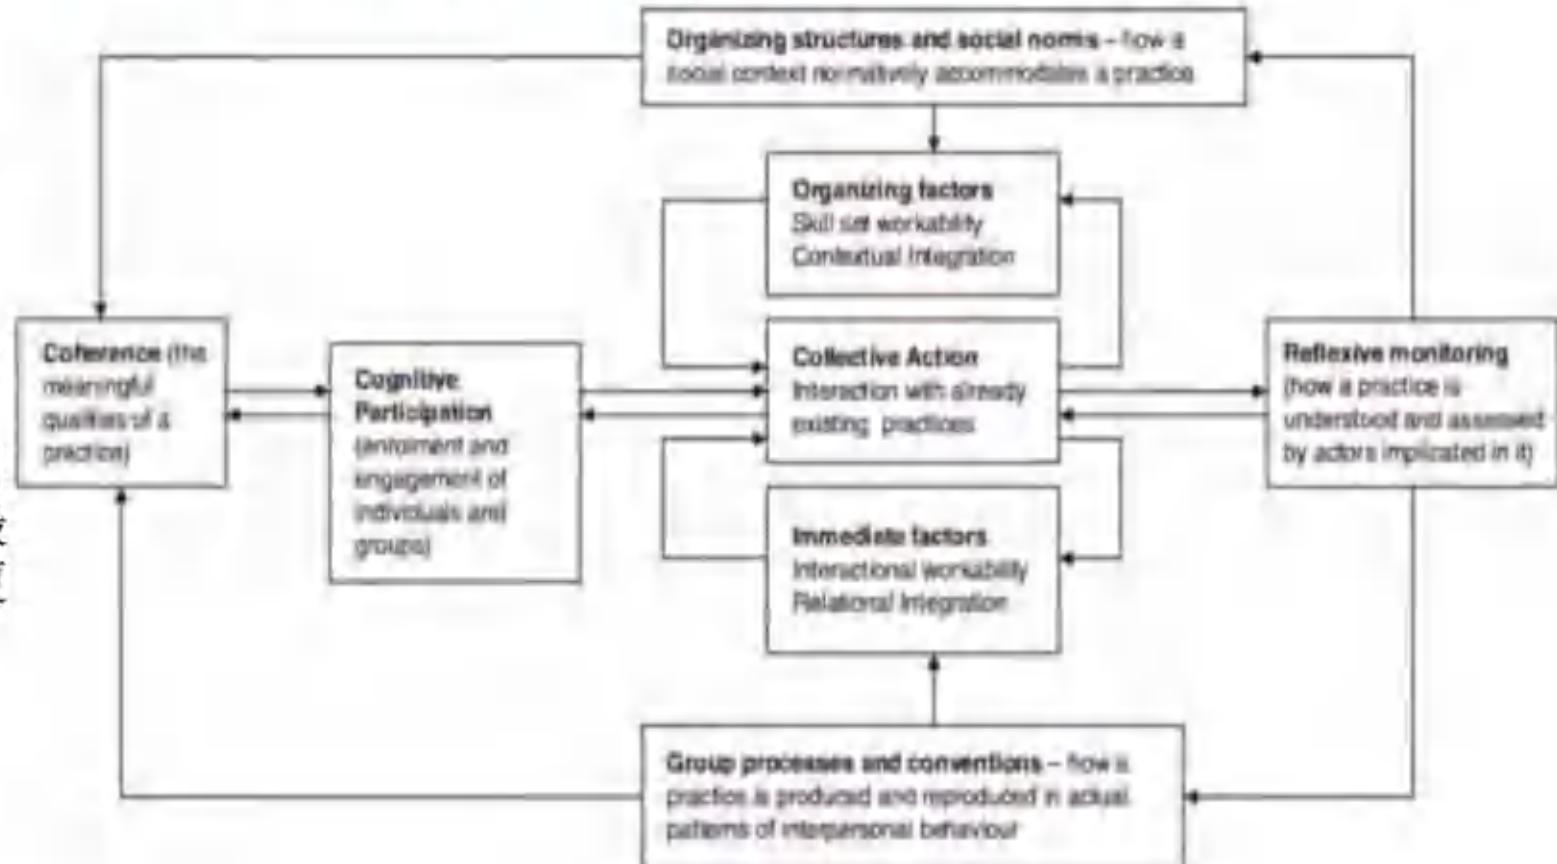

常态化理论 Normalisation process theory

实施临床实践指南的理论经历了三个发展阶段

- 认识到常态化（嵌入）过程的重要性
- 开发常态化过程模型
- 到2009年形成包含4个实施机制的理论

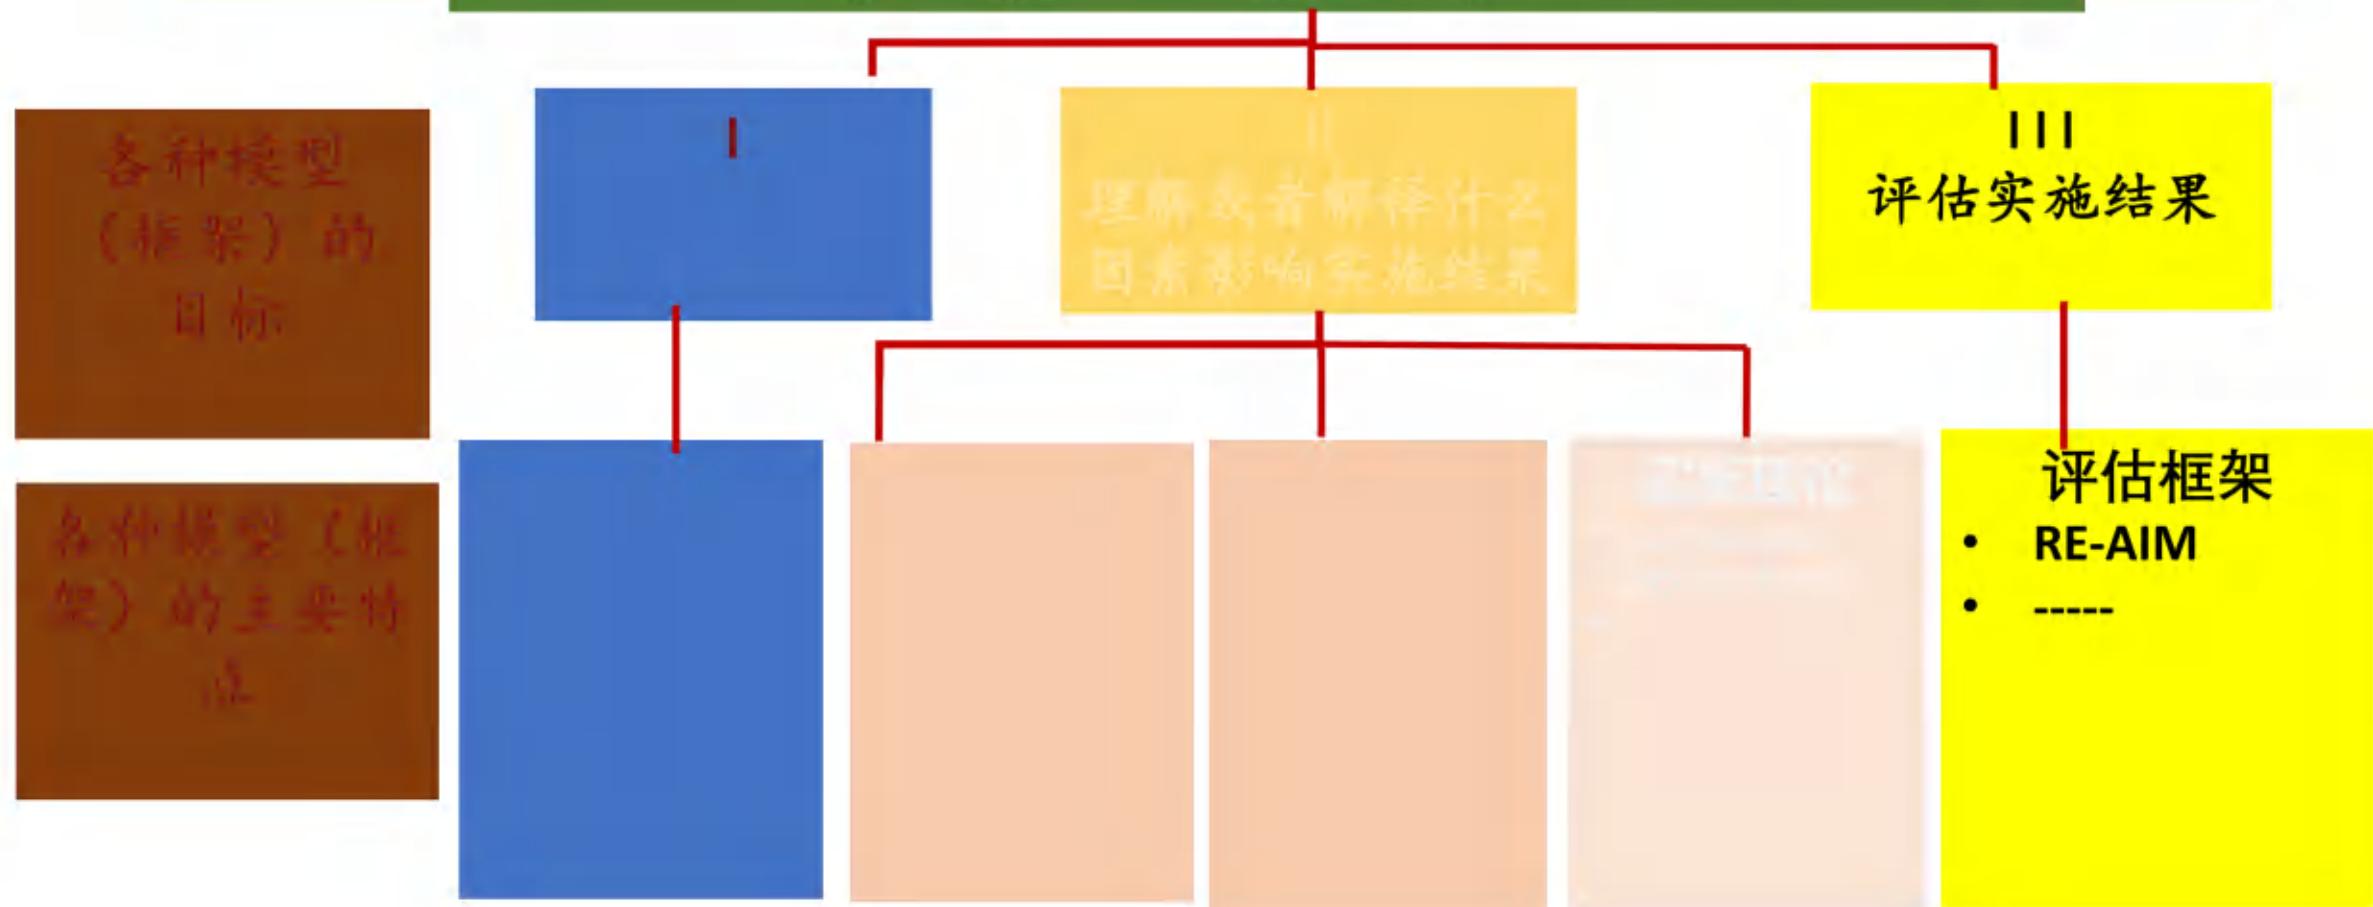

NPT强调，新技术的实施会冲击并改变原有工作模式和社会关系，而新技术能否最终得以常态化，又取决于其是否能适应更新后的工作模式和社会关系。

- <http://normalizationprocess.org/>

Murray, E., Treweek, S., Pope, C. et al. Normalisation process theory: a framework for developing, evaluating and implementing complex interventions. *BMC Med* 8, 63 (2010). <https://doi.org/10.1186/1741-7015-8-63>

实施科学中所使用的理论，模型和框架

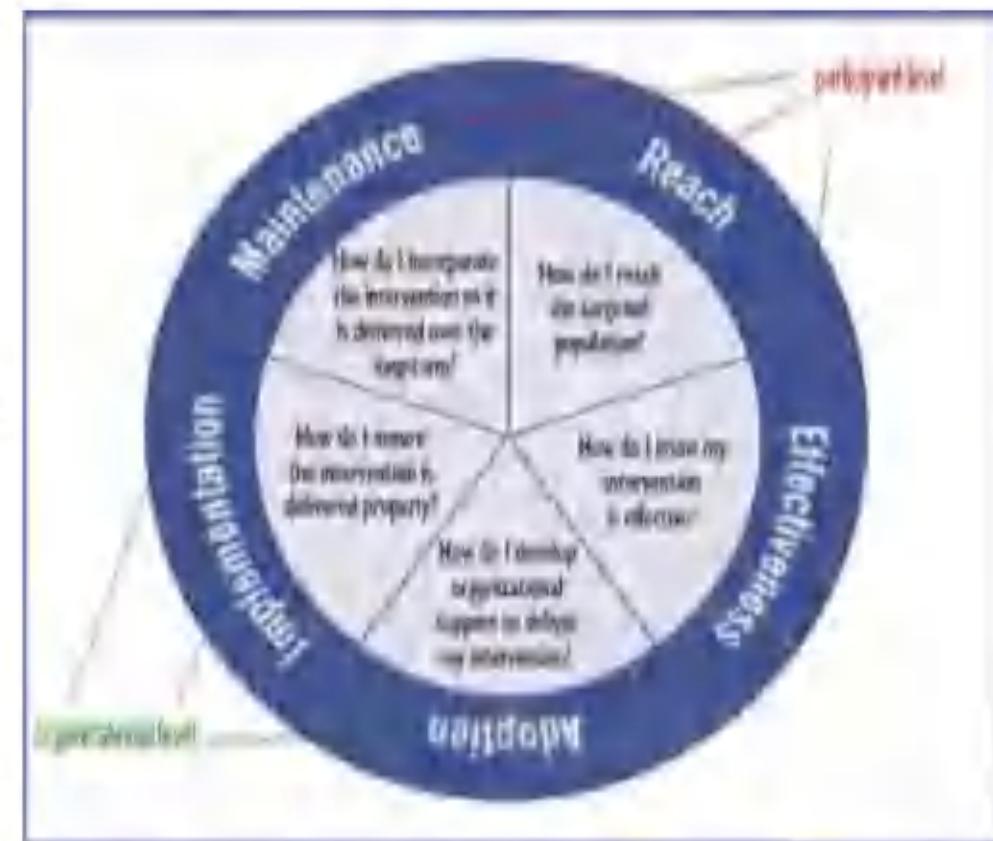

III 评估实施结果

案例：RE-AIM

RE-AIM是由五个要素组成的首字母缩写

- Reach-如何选择干预人群
- Efficacy or effectiveness-如何检验干预措施的有效性
- Adoption-如何保证干预措施在目标场所或相关机构中被采纳和支持
- Implementation-如何保证干预措施被恰当地实施
- Maintenance-如何保证干预措施的可持续性

RE-AIM

Glasgow RE, Harden SM, Gaglio B, Rabin BA, Smith YML, Porter GC, et al. RE-AIM planning and evaluation framework: adapting to new science and practice with a twenty-year review. *Front Public Health.* (2019)7:64.

实施评估框架的应用：北京市学龄儿童校园流感疫苗接种项目质量改进实施评估

研究目的：

1. 基于情境开发的实施策略实施情况如何？
2. 实施的促进和阻碍因素有哪些？
3. 该实施策略能否提高学龄儿童流感疫苗接种率？

干预措施：校园流感疫苗接种

实施策略：多层次质量改进策略

- 体系层面：促进规划与协作
- 学校层面：培训主管校长和校医
- 受众层面：健康教育和提醒

实施评估框架：RE-AIM及常态化过程理论（NPT）

如何选择理论、模型、框架？

Sections of the D&I Models Webtool

Plan

Select

Combine

Adapt

User

Measure

The screenshot shows the 'View All D&I Models' page of the webtool. On the left, there's a vertical sidebar with buttons for 'View All D&I Models', 'View Selected Models', 'Select', 'Adapt', 'Integrate', 'Assess Impact', 'User Guide', 'Planning', 'Log in - Register', and 'Logout'. The main content area has a header 'View All D&I Models' with sub-links 'View All D&I Models' and 'View Selected Models'. Below this is a sub-header 'Description' with a link 'View Description'. The central part is a table titled 'Model' with columns: Name, Description, Model Type, Description, Price of License, and Status. The table lists four models: 'Consolidated Framework for Implementation Research', 'Diffusion of Innovation', 'Interactive Systems Framework', and 'R2-AM Framework'. At the bottom of the page are two buttons: 'Search' and 'Search Results'.

“Experience without theory is blind, theory without experience is mere intellectual play.”

没有理论的经验是盲目的，没有经验的理论只是智力游戏。

——Immanuel Kant

www.dissemination-implementation.org

如何选择理论、模型、框架

The screenshot shows a website interface for managing and comparing Dissemination & Implementation (D&I) models. At the top, there's a navigation bar with links for Home, Resources, Submit Models, About Us, and a search bar labeled 'Search Criteria'. Below the navigation is a section titled 'View All D&I Models' with buttons for 'View All D&I Models' and 'Search D&I Models'. A sidebar on the left contains buttons for 'Select', 'Adapt', 'Integrate', and 'Measure constructs'. The main content area is titled 'Compare Models' and features a table with columns for Model, D&I or I, Construct Flexibility, Socio-Ecological Levels, Field of Origin, # Times Cited, and Rating. The table also includes a row for Individual, Organization, Community, System, and Policy levels. Below the table, four specific models are listed: Consolidated Framework for Implementation Research, Diffusion of Innovation, Interactive Systems Framework, and RE-AIM Framework, each with a 'Description' link.

Model	D&I or I	Construct Flexibility	Socio-Ecological Levels	Field of Origin	# Times Cited	Rating
Individual						
Organization						
Community						
System						
Policy						

Model	D&I or I	Construct Flexibility	Socio-Ecological Levels	Field of Origin	# Times Cited	Rating
Consolidated Framework for Implementation Research	I-Only	4	O C	Health services	91	
Diffusion of Innovation	I-Only	1	I O C	Agriculture	39,364	
Interactive Systems Framework	D=I	2	I O C S	Violence prevention	116	
RE-AIM Framework	D=I	4	I O C	Public Health	728	

Where to
find D&I
models

五、实施研究逻辑框架 (Logic framework of ImpRes)

逻辑模型

逻辑模型（一般来讲）

Logic Models (in general)

- 展示项目或研究中各个元素之间共享关系的图形描述
A graphic depiction that presents the shared relationships among various elements of a program or study
- 在不同利益相关者之间就“what”和“how”达成一致
Develop agreement among diverse stakeholders of the "what" and the "how"
- 通过突出理论上的和实际上的差距来改进规划
Improve planning by highlighting theoretical and practical gaps
- 支持制定有意义的过程指标进行跟踪
Support the development of meaningful process indicators for tracking
- 重现成功的研究/识别不成功研究
Reproduce successful studies / identify failures of unsuccessful studies

Petersen, Taylor, & Peikes, 2013

实施科学逻辑框架全图

大庆糖尿病预防Ⅱ期项目逻辑模型

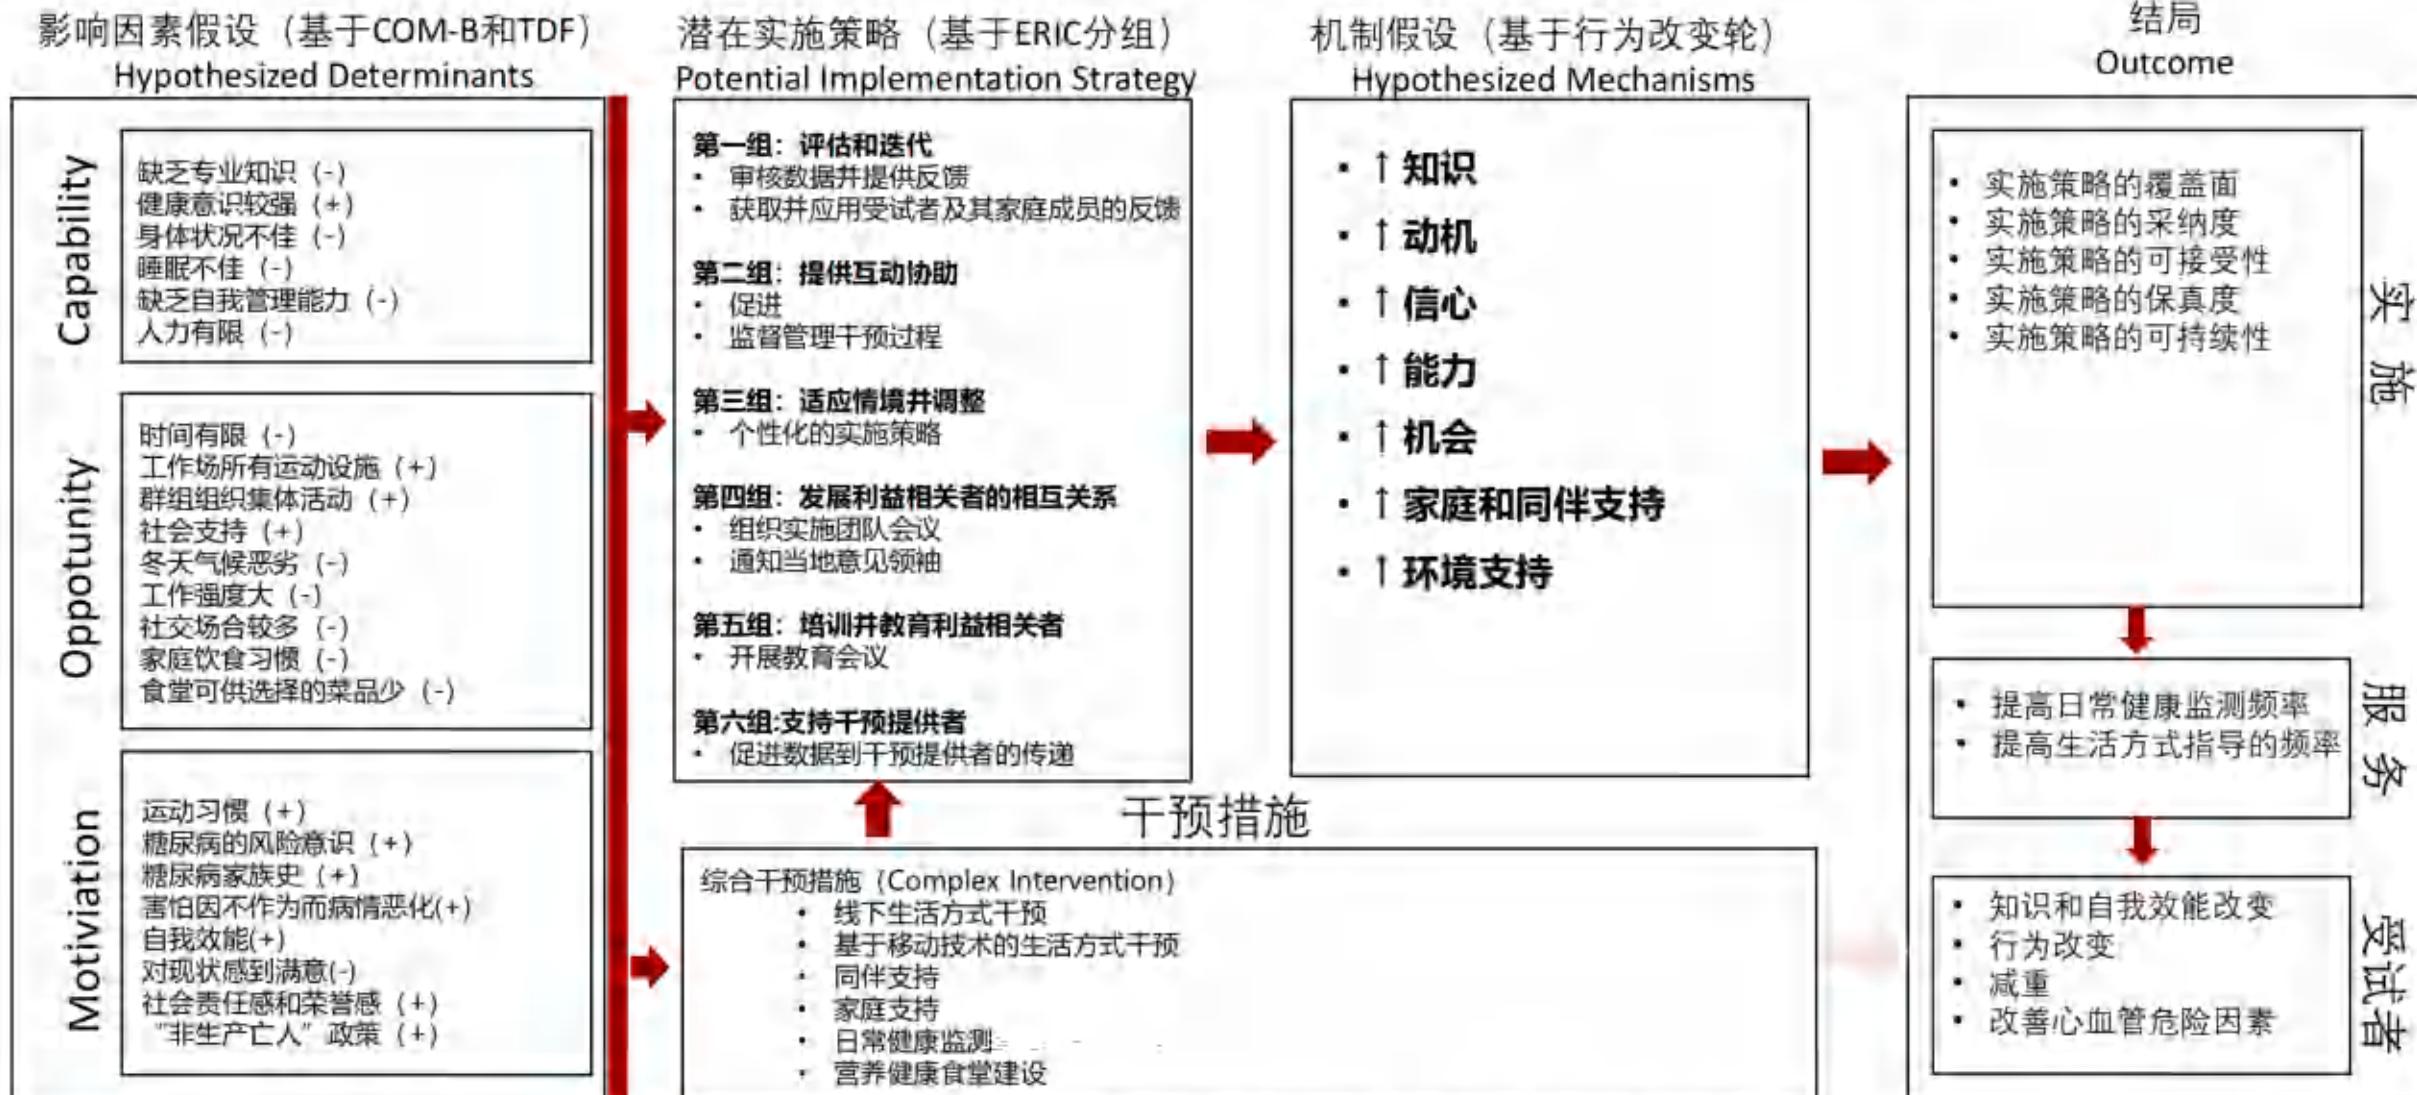

图 2型糖尿病预防综合干预措施实施的逻辑模型

六、分析和匹配实施策略 (Matching ImpStrategies with ERIC)

选择实施策略

Mapping ImpRes strategy

什么是实施策略

What is implementation strategy?

实施策略是为加强循证干预措施的采用、实施和可持续性而采取的行动。

- 如何使正确的事情得以实施；
- 如何使容易的事情得以实施

Implementation strategies are the actions taken to enhance adoption, implementation, and sustainability of evidence-based interventions.

- How to make the “right thing to do”
- The “easy thing to do”

Address specific factors identified in implementation frameworks

实施变革的专家建议 (ERIC)

Expert Recommendations for Implementing Change (ERIC)

The Expert Recommendations for Implementing Change (ERIC) study was developed to address **two major limitations** of the published literature:

1. **Lack of conceptual clarity** surrounding terms and definitions for implementation strategies
2. **Insufficient guidance** about how to select appropriate implementation strategies

73 种离散实施策略

73 Discrete Implementation Strategies

Strategy: Audit and provide feedback

Definition: Collect and summarize clinical performance data over a specified time period and give it to clinicians and administrators to monitor, evaluate, and modify provider behaviour

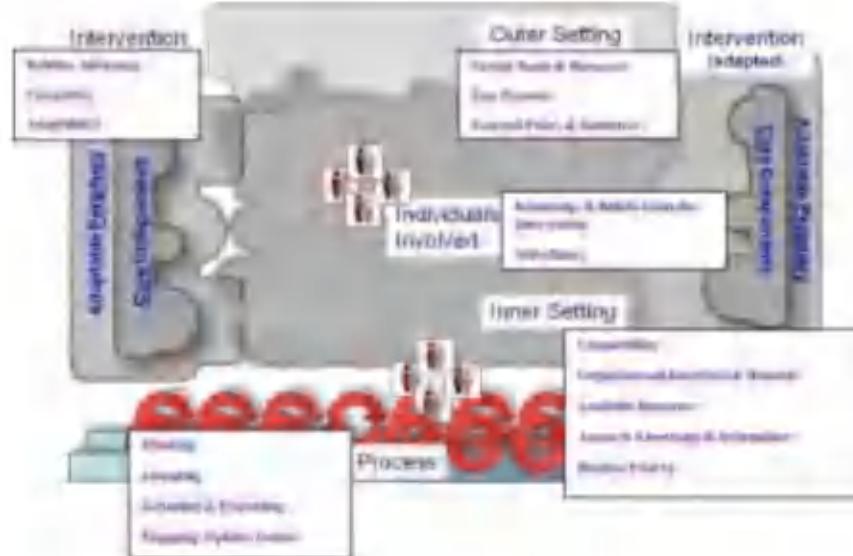

CHICCs实施策略构建路径

第一步：基于级联照护模型，开展定性访谈，识别各地开展高血压和糖尿病管理的障碍

级联阶段	患者层面阻碍因素	卫生服务提供者层面阻碍因素	系统层面阻碍因素
意识	<ul style="list-style-type: none"> 教育文化水平低 	<ul style="list-style-type: none"> 卫生服务提供者人力缺乏 	<ul style="list-style-type: none"> 健康教育考核缺乏量化细则
筛查	<ul style="list-style-type: none"> 无症状，自觉健康 心理因素，害怕被诊断及污名化问题 社会负担重 	<ul style="list-style-type: none"> 卫生服务提供者人力缺乏 初筛精度较差 	<ul style="list-style-type: none"> 缺乏针对性适宜的干预措施
诊断	<ul style="list-style-type: none"> 无症状，自觉健康 不信任基层医疗机构能力 认为诊断项目复杂产生的抗拒 就诊时患者健康问询等需求未被满足 	<ul style="list-style-type: none"> 诊断时间紧张所导致的诊断迅速但不全面 	<ul style="list-style-type: none"> 筛查耗材成本无专项资金支持
治疗	<ul style="list-style-type: none"> 无症状，自觉健康 不良地域饮食习惯与家庭生活方式 健康需求未满足 心理因素：服药顾虑与恐惧，效果缓慢焦虑等 教育文化水平低 电子工具使用障碍与利用率低 多病共存状态 不健康的生活方式 长期治疗的经济负担重 心理因素：服药顾虑与恐惧，效果缓慢焦虑等 药物使用技能不足与药物调整不及时 药物不良反应 缺乏有效的随访与提醒 	<ul style="list-style-type: none"> 治疗厨房机械重复 口头健康指导缺乏具体化与针对性 	<ul style="list-style-type: none"> 医保政策与医疗机构级别对药品可及性限制 分级诊疗缺乏有效衔接
长期管理与控制		<ul style="list-style-type: none"> 疾病病因不明确 卫生服务提供者人力缺乏 基层医务人员水平较低 治疗处方机械重复 口头健康指导缺乏具体化与针对性 	<ul style="list-style-type: none"> 医保政策与医疗机构级别对药品可及性限制 分级诊疗缺乏有效衔接 人口流动 缺少专项资金支持 地区经济欠发达

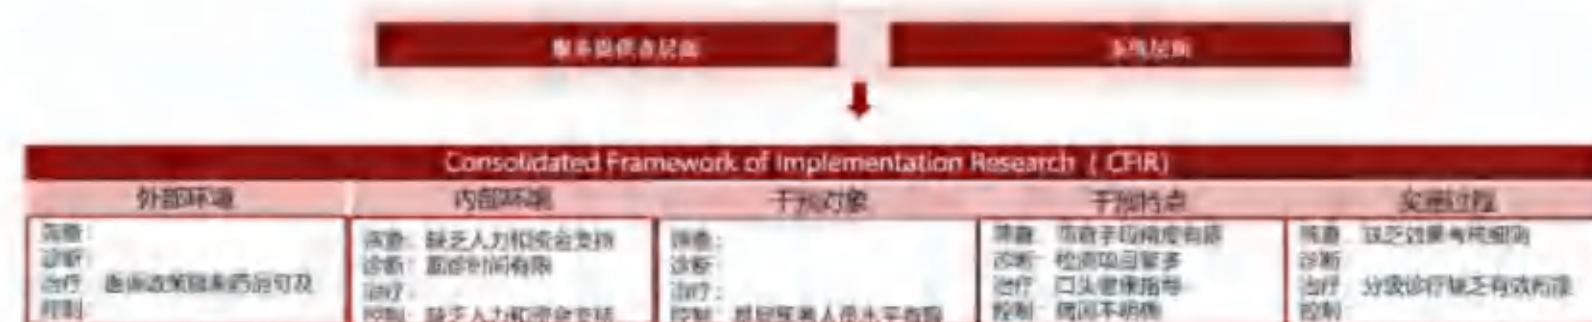

CHICCs实施策略构建路径

第二步：通过CFIR框架匹配实施障碍

维度	干预特征	外部环境	内部环境	个体特征	实施过程
背景	Commodity, Cost	Public Health & Economic Environment	Healthcare Resources, Available Resources	Knowledge & beliefs about the intervention	Implementation & Tailoring
诊断	Diagnosis	Patient Needs & Context	Available Resources	Knowledge & beliefs about the intervention, contextual characteristics with diagnosis	
治疗	Delivery Strategies & Tools, Clinical Quality and Outcomes	Patient Needs & Context, Clinical Policy & Practice	Clinical	Knowledge & beliefs about the intervention, clinical	
外部分析	Delivery Strategies & Tools, Clinical Quality and Outcomes	Delivery Strategies & Tools, Clinical Policy & Practice	Physical & Psychiatric Context, Lightning, Climate, Available Services, Access to Immediate and Holistic Care	Knowledge & beliefs about the intervention, physical and holistic care	
内分析	Adaptations, Clinical Quality and Outcomes	Cooperation	Variables & Interactions, Complexity, Interactions, Available Resources, Implementation, Evaluation, Activation, Processes	Knowledge & beliefs about the intervention, complexity, interactions, available resources, implementation, evaluation, activation, processes	
利益相关者管理					
内部质量改善	Clinical Policy & Practice		Access to Others, Stakeholder Influence	Knowledge & beliefs about the intervention, stakeholder influence	

- CFIR: 综合性框架，用于系统性地分析实施的影响因素，涵盖外部环境、内部环境、干预特征、个体特性和实施过程五个维度

CHICCs实施策略构建路径

第三步：通过CFIR-ERIC生成实施策略清单

七、实施研究设计和方法

(Study design and method in ImpRes)

效力 vs. 效果

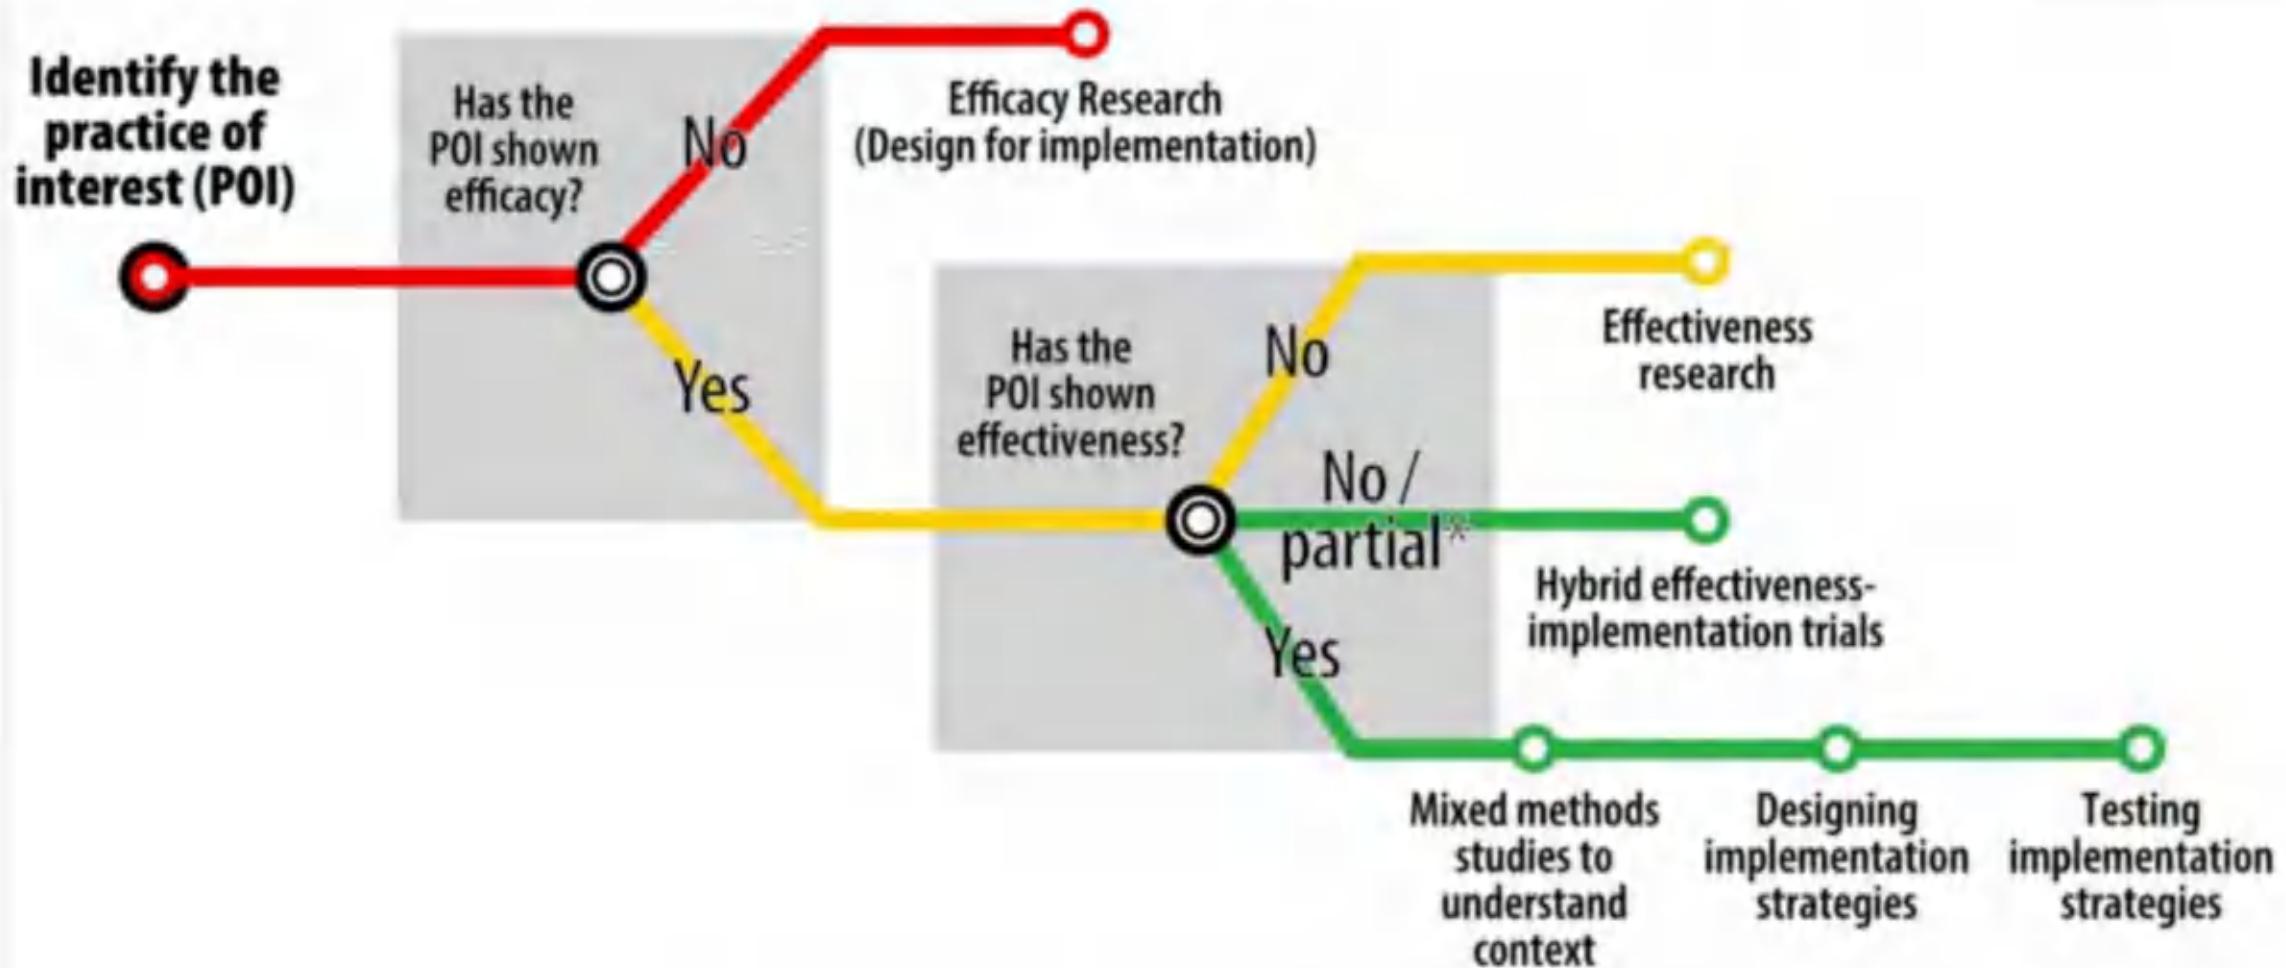

Efficacy study Vs effectiveness study:

Differences between efficacy and effectiveness studies

	Efficacy study	Effectiveness study
Question	Does the intervention work under ideal circumstance?	Does the intervention work in real-world practice?
Setting	Resource-intensive 'ideal setting'	Real-world everyday clinical setting
Study population	Highly selected, homogenous population Several exclusion criteria	Heterogeneous population Few to no exclusion criteria
Providers	Highly experienced and trained	Representative usual providers
Intervention	Strictly enforced and standardized No concurrent interventions	Applied with flexibility Concurrent interventions and cross-over permitted

指导研究人员开展基于证据的干预措施的实施研究示意图

“Subway” schematic to guide researchers contemplating implementation studies of evidence-based interventions

Lane-Fall et al. BMC Medical Research Methodology (2019) 19:133 <https://doi.org/10.1186/s12874-019-0783-z>

实验、准实验和观察研究设计

研究设计类型	定义	应用	实施科学的例子
实验设计			
Between-site design/ 跨中心间设计	此类设计比较了具有不同暴露情况的中心之间的卫生保健过程和产出。	允许研究者比较具有不同暴露情况的中心之间的卫生保健过程和产出。	Ayieko et al. [13], Finch et al. [14], Kilbourne et al. [15]
Within- and between-site design 中心内和不同中心间的比较设计	此类设计的比较可以通过交叉设计进行，即研究中心从一个实施条件开始，然后切换到另一个条件。	接受新的实施策略，或者在整个研究期间拒绝采用新的实施策略是不符合伦理的。	Smith and Hasan [16] Fuller et al. [17]
准实验设计	Quasi-experimental design		
Within-site design/ 单中心内设计	此类设计研究了暴露于相同传播或实施策略的一个或多个中心随时间变化的情况。	这类单一中心或单一单位（从业人员、临床团队、医疗系统和社区）的研究设计通常与它们自身以往的情况作比较。	Smith et al. [18] Smith et al. [19] Taljaard et al. [20] Yelland et al. [21]
观察性研究	Observational design		
观察性研究（描述性研究）	描述感兴趣的结果及其在自然环境中前因后果。	用于评估证据在现实世界中的适用性	Harrison et al. [22] Salanitro et al. [23]

实验、准实验和观察研究设计

研究设计类型	定义	应用	实施科学的例子
Configurational comparative methods/ 配置比较方法	将内部案例分析与基于逻辑的跨案例分析相结合，以确定实施等结果的决定因素。	有助于识别多种可能的干预组成部分、实施方式和环境特征的组合，这些组合相互作用而产生效果。	Kahwati et al. [24] Breuer et al. [25]
Simulation studies/ 模拟研究	一种通过描述系统实体及其相互作用的行为规则来模拟复杂系统行为的方法。	提供一种解决方案，用于理解实施的驱动因素以及实施策略可能的影响。	Zimmerman et al. [26] Jenness et al. [27]
Hybrid Type 1/混合 I型研究	在测试临床干预措施的同时，收集有关其实施情况和/或在实际情境中实施的潜力的信息，重点是评估干预措施的有效性。	提供了探索实施计划未来实施的理想机会。	Lane-Fall et al. [28] Ma et al. [29]
Hybrid Type 2/混合 II型研究	同时测试临床干预和实施干预/策略。	能够同等强调评估干预措施的有效性、可行性以及/或者实施策略的潜在影响。	Garner et al. [30] Smith et al. [31]
Hybrid Type 3/混合 III型研究	主要测试实施策略，其次是收集临床干预和相关结局的数据。	当研究人员打算在没有完成完整的有效性研究，甚至有时没有进行适度的有效性研究的情况下进行实施研究时。	Bauer et al. [32] Kilbourne et al. [33]

八、干预结果与实施效应评估 (Evaluation of the intervention and IR)

实施科学的研究的阶段

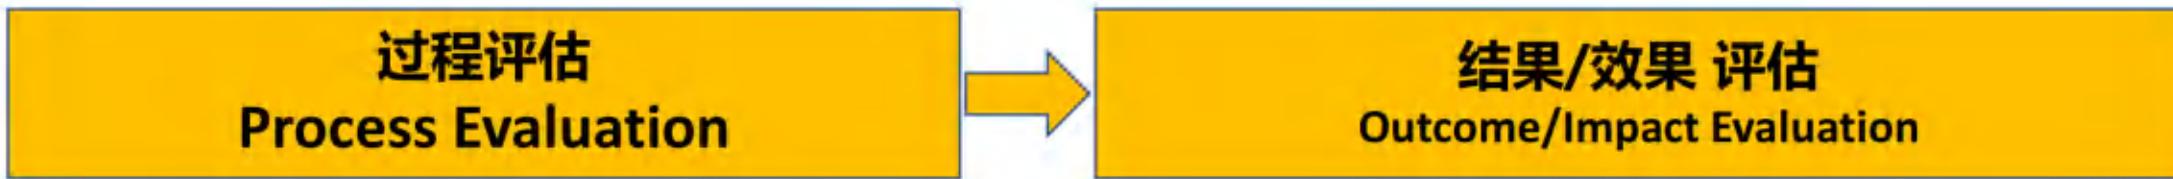

第四阶段

- Phase four**
- 过程评估与结果评估：理解变化的原因和健康结局**
1. 过程评估：定期收集进度数据并反馈
 2. 健康结果评估
 3. 分析资料
 4. 报告过程评估与结果评估结果

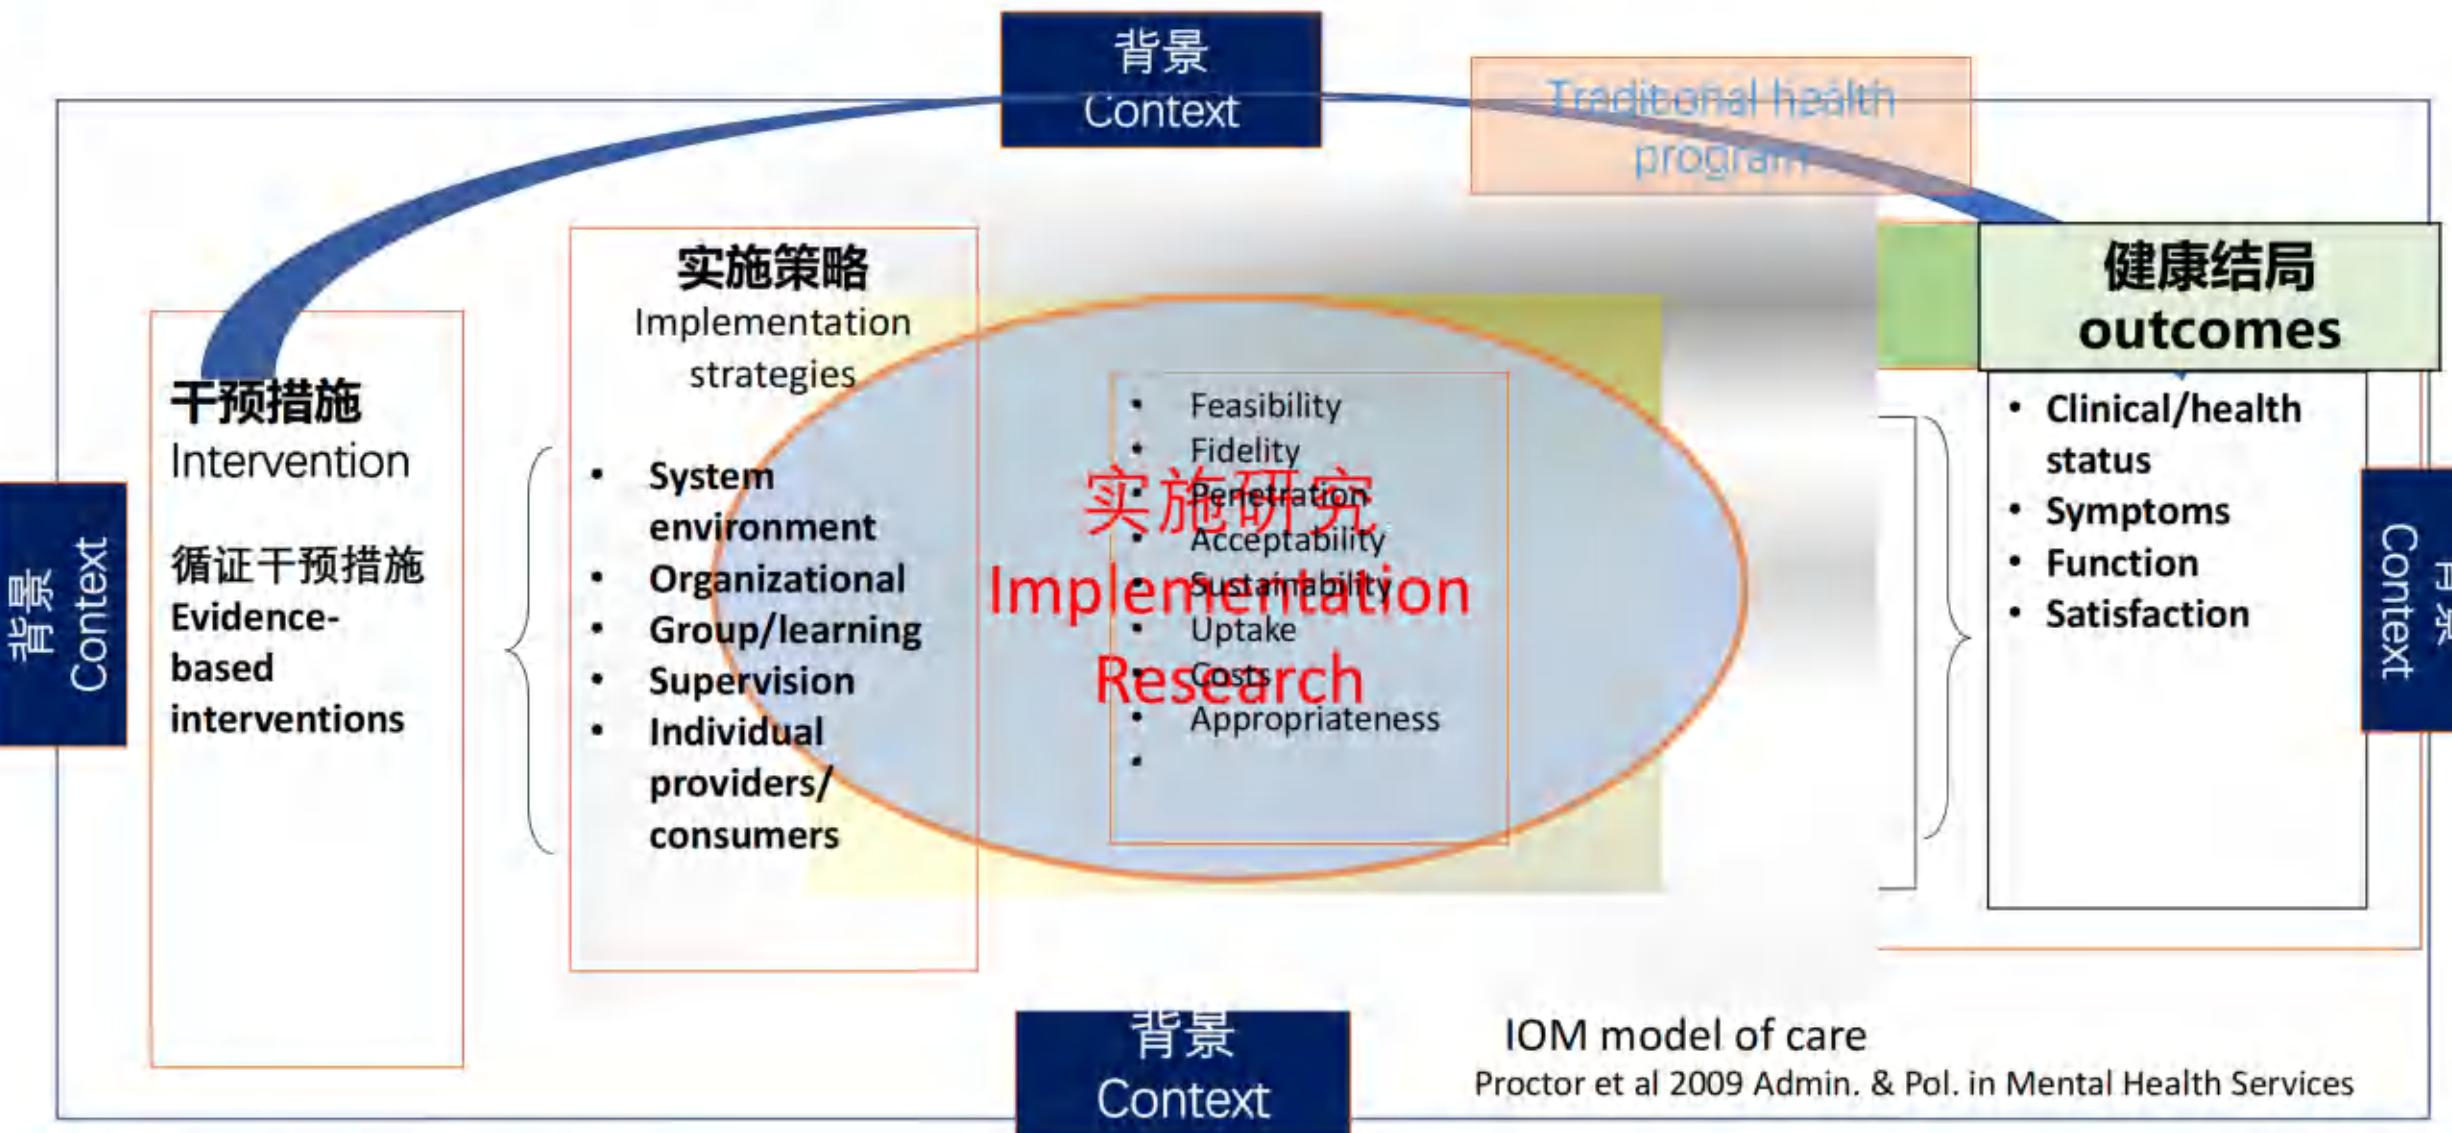

逻辑模型用于评估

A logic model for evaluation

INPUTS	ACTIVITIES	OUTPUTS	Outcomes		
			Short-Term	Medium-Term	Long-Term
What we invest	What we do	Direct products from program activities	Changes in knowledge, skills, attitudes, opinions	Changes in behavior or action that result from participants' new knowledge	Meaningful changes, often in their condition or status in life

干预与实施研究评估概念框架

实施结局

Implementation Outcomes

“We define implementation outcomes as the effects of deliberate and purposive actions to implement new treatments, practices and services.”

- ✓ Indicators of implementation success
- ✓ Proximal indicator of implementation process
- ✓ Intermediate outcomes in relation to service system or clinical outcomes in treatment effectiveness and quality of care research

Implementation outcomes

- Acceptability
- Appropriateness
- Feasibility
- Adoption/Uptake
- Fidelity
- Penetration
- Sustainability
- Costs
- ...

实施结局的选择

Selection of implementation outcomes

Implementation outcome	Unit of analysis	Salience by phase	Data collection approach
可接受性 Acceptability	Individual provider Individual health users (patients)	Early, ongoing	Survey, qualitative or semi-structure interview, administrative data
采纳 Adoption	Individual provider Organization or health setting	Early to mid	Administrative data, observation, qualitative or semi-structured interviews
适当 Appropriateness	Individual provider Individual health user Organization or setting	Early (prior to adoption)	Survey, qualitative or semi-structure interview, focus group
可行 Feasibility	Individual providers Organization or setting	Early (during adoption)	Survey, Administrative data
保真 Fidelity	Individual provider Provider teams (aggregated)	Early, mid, overtime (drift)	Observation, Checklist, self-report
实施成本 Implementation cost	Provider Organization or health setting	Early, mid, late	Administrative data
整合 Penetration	Organization or setting	Mid to Late	Case audit, checklists
可持续 Sustainability	Administrators Organization or setting	Late	Case audit, checklist, questionnaire, semi-structured interviews

实施结局数据收集：混合方法研究

RE-AIM 维度	指标	数据来源	数据 类型	数据收集 阶段
覆盖	参与本研究的学龄儿童/家长比例和代表性	招募数据和家长基线调查	定量	实施前
	拒绝参与本研究的原因	利益相关者个人深度访谈	定性	实施后
采纳	采纳多层次质量改进策略的学校数量和比例	工作清单共享文档	定量	实施中
	NPT思想认同：对多层次质量改进策略的理解	校医和班主任随访调查NoMAD工具 利益相关者个人深度访谈	定量 定性	实施后
实施	NPT认知参与：对多层次质量改进策略融入常规的理解	校医和班主任随访调查NoMAD工具 利益相关者个人深度访谈	定量 定性	实施后
	依照方案实施多层次质量改进策略的学校数量和比例	工作清单共享文档	定量	实施中
维持	NPT集体行动：实施过程中的工作分配、资源和困难	校医和班主任随访调查NoMAD工具 利益相关者个人深度访谈	定量 定性	实施后
	NPT反思性监测：对多层次质量改进策略的调整、评价和反馈	校医和班主任随访调查NoMAD工具 利益相关者个人深度访谈	定量 定性	实施后
效果	维持多层次质量改进策略的意愿	校医、班主任和家长随访调查	定量	实施后
	愿意或不愿意维持多层次质量改进策略的原因和改进期望	利益相关者个人深度访谈	定性	实施后
效果	家长报告的2022—2023年流感季学龄儿童是否接种流感疫苗	家长随访调查	定量	实施后

RE-AIM	NPT	核心问题
背景	· 情境	· 他认为多层次质量改进策略在多大程度上覆盖了目标人群？
采纳	· 思想 · 认同	· 有部分家长拒绝参与研究，您认为是出于什么原因？ · 您如何理解多层次质量改进策略？
实施	· 认知 · 参与 · 行为	· 多层次质量改进策略有哪些主要内容或活动？ · 今年开展的这些活动与往年的常规工作有什么不同？ · 多层次质量改进策略和您本职工作的关系是什么？工作量如何？ · 对推动多层次质量改进策略的实施而言，有哪些关键人物？ · 您和其他人是如何合作来开展多层次质量改进策略的？ · 您参加了哪些培训，帮助您实施多层次质量改进策略？您觉得自己具备了实施多层次质量改进策略所需的相关能力吗？
反思	· 行动	· 多层次质量改进策略和您日常工作融合得怎样？与您自身原来或现有工作方式哪些方面不契合？ · 实施多层次质量改进策略的过程遇到了哪些困难？如何解决的？ · 根据实际情况下实施多层次质量改进策略的灵活性和可操作性如何？您根据实际情况对哪些活动进行了一些调整？进行了哪些调整？

基于RE-AIM和NPT构建的访谈提纲

维持

实施科学的研究阶段

1. 确定实施什么以及来源 (如指南)
2. 干预措施实施差距或存在问题是什么? 科学问题?
3. 评估场境及资料收集方法和工具, 评估造成差距的原因 (有利因素和不利因素)
4. 选择实施科学的理论或者模型指导实践

现状评估;明确问题以及原因

Phase one

1. 提高项目执行能力(如培训)、调整机构配置与功能
2. 提供必要的基本仪器、工具、指南和其他材料
3. 规律地监督执行和反馈结果。
4. 根据反馈结果调整执行方案

按照研究方案实施干预措施和策略

Phase three

第一阶段

第二阶段

第三阶段

第四阶段

Phase two

实施实施研究方案: 筛选干预措施、实施策略以及研究设计

1. 制定实施研究方案
 - ✓ 确定项目目标、确定干预措施、确定实施策略
 - ✓ 确定逻辑框架与路线图
 - ✓ 设计评估方案与资料收集方法: 实施研究还是干预结合实施研究?
2. 确定研究项目执行质控方案

Phase four

过程评估与结果评估: 理解变化的原因和健康结局

1. 过程评估: 定期收集进度数据并反馈
2. 健康结果评估
3. 分析资料
4. 报告过程评估与结果评估结果

请批评指正！
